Add an Account

Jul 16, 2021 4:50 AM

For some channels, accounts can be added to Sprinklr with only a username and a password, while others may require you to authenticate via the specific social network for which certain terms and conditions may apply. For example, while adding a Facebook page, you are prompted to "allow Sprinklr to post on my behalf" which you need to confirm to be able to post via Sprinklr on behalf of that page.

The native permissions on certain social channels may affect your ability to add an account in Sprinklr. Facebook, for example, requires that you be the administrator of the page to be able to grant Sprinklr access to post on behalf of the page.

Note

- Once the password of a social media account is changed natively, that account becomes inactive in Sprinklr. To continue using the social media account in Sprinklr, the account holder must re-authorize the accounts in Sprinklr.
- The label Account Type is now customizable within Persona Configuration and Experience Engine. You can configure it as per your business requirements.
Planning Accounts

To learn more about getting this capability enabled in your environment, please work with your Success Manager.

Sprinklr has updated and renamed certain planning account types and channels. The list of the updated and renamed account types and channels are as following:

- Intranet to Internal
- Live Events to Events
- Out-of-home to Out-of-home Advertising
- Partnership to Media Partnerships
- On Air Appearance to Appearance
- Radio to Radio/Podcast

To Add an Account

1. Click the New Tab icon +. Under Governance Console, click Social Accounts within Listen.
**Listen**

Capture and pay attention to legally available unstructured, unsolicited data from modern channels and millions of sites including forums, blogs, and reviews.

**Connect your modern channels**

- Social Accounts
- Messaging Accounts
- Live Chat
- Email
- Voice

**Listen to Legally available Public Digital Data**

- Topics
- Themes

**Listen to Data from other Internal Systems**

- First Party Data Ingestion
- Manage Pipelines
- Data Collection

2. In the **Accounts (Settings)** window, click **Add Account** in the top right corner.

**Note**

Before adding an account, make sure to log out of any account relevant to the account type.
3. In the **Add Account** window, search and select desired social channel from the list of channels.

4. Depending on the account type, you may be prompted to login natively using the credentials for your native account and perform the authentication. For more information, see [Account Authorization](https://help.sprinklr.com/articles/account/add-an-account/613766575f2e7c0c9ed36e3d).

5. Once you've added an account within Sprinklr, you'll be redirected to the **Update Account** window where you can update the details of your account. For more information, see [To Update an Account](https://help.sprinklr.com/articles/account/add-an-account/613766575f2e7c0c9ed36e3d).
6. Click **Save** in the bottom right corner.

## Account Authorization

To Update an Account
Once the account is authorized and gets added to the platform, you'll be redirected to the **Update Account** window where you can update the details of your account. By default, the user who added the credentials for the account is considered the Account Owner. However, an admin having proper permissions to the account can change the account owner by selecting a new user as the account owner. For more information, see [Update Account — Field Descriptions](https://help.sprinklr.com/articles/account/add-an-account/613766575f2e7c0c9ed36e3d).

### Update Account — Field Descriptions

</tbody>
</table>
Timezone
Select a timezone to associate to the account.

Properties

Workflow
Add workflow properties to the account.

Others
Add custom properties to the account.

User Filter for Adding Accounts

While adding a location page to a social account, you now have filters to narrow down your search. You can search the location pages by Active, Inactive, In System, and Not Added. (Ex: Facebook Page)
