Types of Marketing Partners

Today, there are hundreds of partners in the LinkedIn marketing partner community. They offer a range of services and solutions categorized by specialty or what they do for LinkedIn customers, and service model or how they do it. But, when it comes to creating value for marketing organizations and agencies, our self service technology and content partners are in a class of their own.

Self Service Technology

Technology Partners have built on the LinkedIn Marketing Solutions APIs to enable you to develop a marketing strategy, activate and optimize campaigns, and measure success. For easier discovery and evaluation, we've broken these partners into the following specialities based on the value they provide:

- Page Management
- Campaign Management
- Audiences

- Reporting & ROI

It's important to note that some technology partners only support a handful of functions within a single category, while others span all functionalities of multiple specialities.
