

Mercedes-Benz USA gets more mileage from LinkedIn Sponsored Content

“LinkedIn Sponsored Content helps our marketing messages resonate with our target audiences, and reach our consumers where they spend time online in a relevant and meaningful way—especially when coupled with Display Ad campaigns. In today’s crowded marketplace, having engaging content and distributing it via a nimble, cohesive paid/earned/owned promotional plan is key. Sponsored Content allows people to not only learn more about the brand and how we’re constantly improving on technology and luxury, but to share this knowledge with colleagues.”

Mark Aikman
Social Media Lead
Mercedes-Benz USA

Challenge

As Mercedes-Benz USA launched its newest E-Class and S-Class models, they sought innovative ways to build awareness about their luxury line by sharing compelling content with an affluent audience. They also sought a marketing tool that would add value to its Display Ad branding campaign on LinkedIn.

Solution

Mercedes-Benz USA, working with digital agencies Merkle + Partners and Razorfish, used Sponsored Content coupled with Display Ads to promote videos of their luxury line to a targeted audience in a relevant and meaningful way. Sponsored Content helped Mercedes reach a premium audience that’s receptive to its marketing messages, in a context that drives greater relevance and impact.

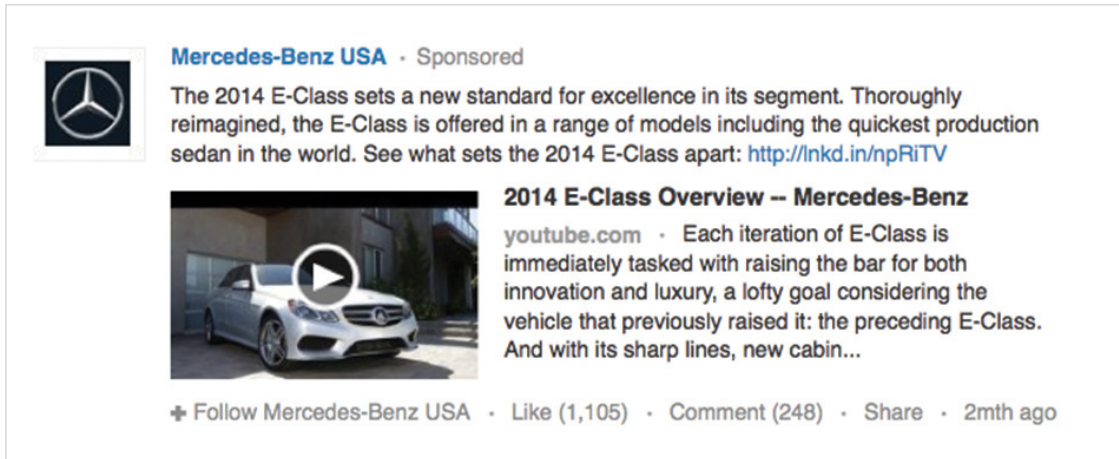

As part of its Sponsored Content campaign, Mercedes-Benz USA:

- Created greater reach for news about the new E-Class and S-class models
- Generated real-time analytics on content, providing insight for future content development
- Targeted content to a broad audience of professionals and senior executives
- Used LinkedIn Display Ads to drive qualified traffic to Mercedes-Benz USA website

Results

Sponsored Content provided a new way for Mercedes-Benz USA to engage with high-net-worth professionals, resulting in engagement rates of up to 1 percent. The ability to add rich media content such as video to top-performing posts also helped drive high engagement.
