Five key trends to help technology marketers prepare for the Age of Agility:

1. Empower the next generation of IT guides

A wide range of non-IT functions are collaborating on technology purchases. To help drive consensus, IT must act less like a gatekeeper, and more like a guide

Technology marketers should work to **increase brand and product familiarity** across key buying committee audiences

2. Aim for fame in the customer journey

Brand remains a catalyst for differentiation in a crowded market, especially when buying journeys are long

With decision-makers more heavily involved in early buying stages, **building awareness** through brand is more important than ever

3. Address the committee's paradox of needs

Technology buying decisions are expected to meet a vast set of requirements

Technology marketers must help potential customers navigate their paradox of needs by demonstrating: **reliability + value + relevance**

4. Spark the virtual water cooler

With social media democratizing the buying process, reputation is everything

Technology marketers can **spark the virtual water cooler** by giving end users something to talk about **through community and conversation**

5. Seize the post-sale frontier

With budgets under scrutiny, vendors should seek to unlock greater value for existing customers

Top purchasing drivers for technology decision-makers

Technology marketers can harness the power of **post-sale support** to boost cross-sell, upsell, and retention rates

With the **global pandemic significantly impacting technology budgets, usage, and adoption**, we've entered a new era of innovation, market forces, and decision-making.

These five key lessons will help you grow and advance in the **Age of Agility**.

Expect the unexpected. Prepare to adapt.
