Market to who matters

LinkedIn presents a unique opportunity for brands. For the first time in the history of media, you can reach the world’s professionals—all in one place.
More than 433M people worldwide gather on LinkedIn to stay connected and informed, advance their careers, and work smarter. Together they comprise the largest global community of business professionals. These are the decision-makers, influencers, and the leaders of today and tomorrow—precisely the people you want to target.
LinkedIn is the most effective platform to engage the people that matter most to your business.

The world’s professionals are coming to LinkedIn with purpose and consuming a range of professional content including industry news, expert advice, professional learning, peer insights, and recommendations. You achieve your goals on LinkedIn by targeting the right audience and sharing valuable content through products tailored to how professionals engage on the platform.

94% of B2B marketers use LinkedIn to distribute content

LinkedIn is rated the top social network for lead generation

1 B2B Content Marketing, 2016 Benchmarks, Content Marketing Institute/MarketingProfs.
2 The State of B2B Digital Marketing, Fall 2015, Demandwave.
LinkedIn members engage with our platform to further their career goals. They come to LinkedIn specifically to connect with people, brands, and opportunities, and engage with high-quality content that addresses their desire to become more productive and successful.

This is a very different mindset and intent from other social media platforms. And it’s precisely this aspirational mindset that has led to the explosion of content now shared weekly on the LinkedIn feed.

Content impressions include everything from profile updates to rich media content, long-form articles, and more. There are currently 9 billion content impressions in the feed every week—that’s 15 times more content impressions than job postings served in the feed. And the majority of this engagement occurs on mobile. In fact, more than 57 percent of the time, members access LinkedIn content from their mobile device.

LinkedIn enables you to reach a coveted audience in a professional context and engage them with valuable content when they’re active on the platform and most receptive to your message.
