REVSURE

RevSure LinkedIn Integration Implementation Guide

Below are the steps required to connect LinkedIn to RevSure:
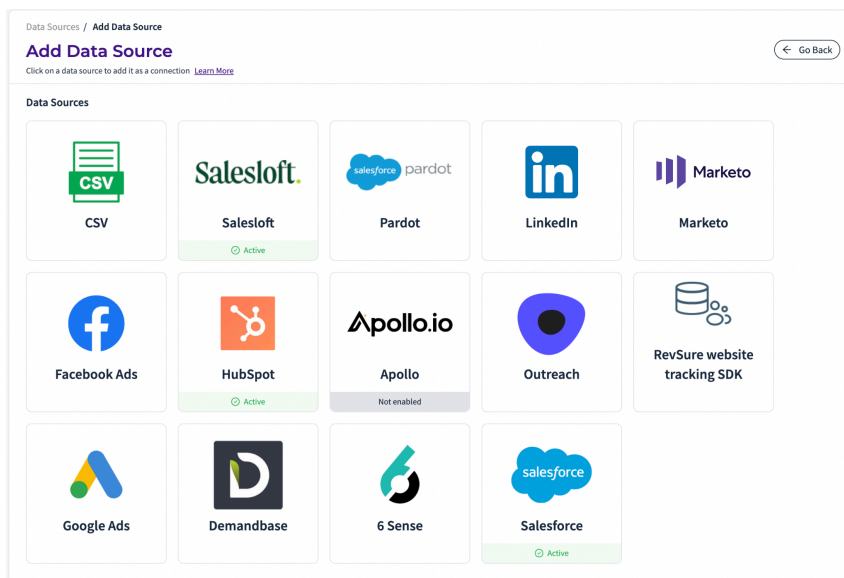

Step 1: Navigate to the data-hub module in the RevSure account. Click on the Add data source button

Step 2: Choose LinkedIn, it will open a sidebar. Enter a unique connection name to identify the connection. Additionally, choose the extra fields required to sync the data.

Step 4: Once authorization is successful, choose a LinkedIn account ID.
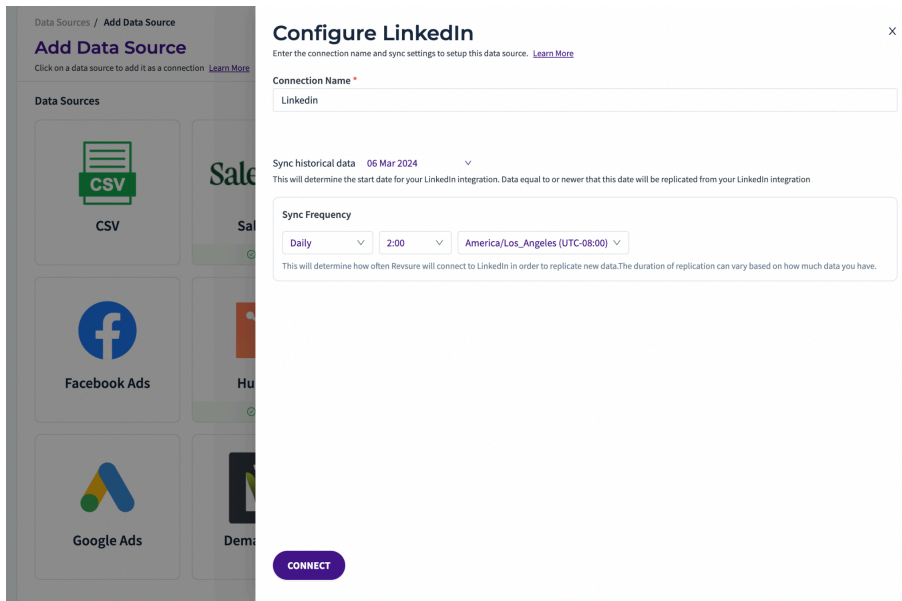

Step 5: Choose the LinkedIn account you want to connect to RevSure and save the connection.

Step 1: Navigate to the data-hub module in the RevSure account. Click on the Add Data Source button

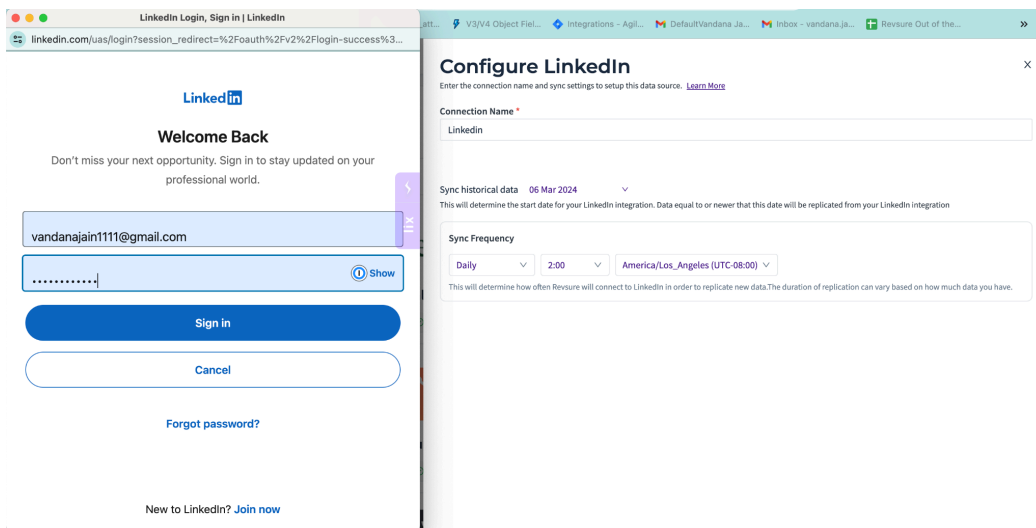

You'll see a list of all source types available in RevSure.

Step 2: Choose LinkedIn, it will open a sidebar. Enter a unique connection name to identify connections. Additionally, choose extra fields required to sync the data.

Step 3: Click on the connect button which will start the authorization process.

A pop-up will open, enter the details of the LinkedIn user who wants to authenticate to the RevSure application.

Step 4 Once authorization is successful, choose a LinkedIn account ID.

Configure LinkedIn   ✕

Enter the connection name and sync settings to setup this data source. Learn More

Connection Name *

Linkedin

Account Id *

Choose Account Id   ⌄

509989656   RevSure.AI Inc.

Sync historical data   **06 Mar 2024**   ⌄

This will determine the start date for your LinkedIn integration. Data equal to or newer that this date will be replicated from your LinkedIn integration

Sync Frequency

Daily   ⌄   2:00   ⌄   America/Los_Angeles (UTC-08:00)   ⌄

This will determine how often Revsure will connect to LinkedIn in order to replicate new data.The duration of replication can vary based on how much data you have.

Step 5: Choose the LinkedIn account you want to connect to RevSure and save the connection
