

Introducing Job Slots

Plan to hire multiple people this year and want a cost-effective solution for posting open jobs? With LinkedIn Job Slots, you can rotate an unlimited number of job posts in and out during a 12-month period and edit them endlessly.

LinkedIn's vibrant community is active and engaged, which gives us the deepest, most up-to-date, and insightful dataset on professionals. It's because of this that we're uniquely able to match your role to the right talent, automatically.

Match your open jobs to candidates you can't find anywhere else

Reach a unique audience

Get your open roles in front of candidates who are open to new opportunities, not just actively searching.

Attract qualified applicants

Find candidates based on skills, experience, and interests through real-time data and smart targeting. Plus, see people who viewed a job, but didn't end up applying.

Manage your candidates

Build awareness and interest for your open roles, and warm up key talent pools for you and your team to re-engage when needed.

“If a colleague asked me what it takes to be a good recruiter in 2017, I'd say LinkedIn Jobs. I'd be lost without it.”

Charlotte Johns

Head of Recruitment Operations, Transport for London
