

# Talent Connect Summit

BIG IDEAS SESSION | OCTOBER 21, 2025

## Hiring Better and Faster with AI: Inside LinkedIn's Product Roadmap

See what's ahead on LinkedIn's hiring product roadmap and how our AI strategy is evolving to meet new market demands. This session unpacks the why behind LinkedIn's agentic approach to AI, what makes our tools uniquely effective, and how AI-powered innovations like Hiring Assistant are helping teams save time, uncover hidden talent, and deliver better outcomes. You'll leave with a clear view of how LinkedIn is set up to be your strategic partner for the age of AI.

SPEAKER

**Dan Reid**

Senior Director, Product Management,  
LinkedIn

We're transforming hiring by leveraging AI to deliver real, measurable results that empower organizations to hire more efficiently and effectively and drive meaningful talent outcomes today and in the future.

### Straight from the Speaker:

*"I want everybody to be skeptical. Be skeptical about AI, and be skeptical about what is real, and what's really working. I want you to touch [the product]. I want you to feel it. I want you to try it. I want you to trial it. [And] I also want you to do that for every other AI product as well." - Dan Reid*

### Key Takeaways:

- As recruiters engage with LinkedIn, every action feeds into a smarter system that learns what works, optimizes across channels, and drives faster, more effective hiring — providing a connected, intelligent platform across your hiring needs.
- Built for enterprise scale and grounded in Responsible AI, Hiring Assistant delivers faster, higher-quality hires and gives companies the confidence to focus on strategic priorities like internal mobility, employer brand, and upskilling for AI. And it's working. On average, customers report saving over 4+ hours per role with Hiring Assistant.

### Practical Tips & Actions:

- Learn more about [Hiring Assistant](#), the only AI agent for recruiters powered by the world's most dynamic talent network.
- Explore the [2026 LinkedIn Hiring Release](#), our upcoming innovations launching over the next year.
