Connect LinkedIn Recruiter with Dynamics 365 for Talent: Attract
Link your accounts in a few simple steps

in Recruiter | **Microsoft**

Introducing Recruiter System Connect

LinkedIn Recruiter System Connect (RSC) integrates LinkedIn Recruiter with your Dynamics 365 for Talent: Attract account to make your hiring process even simpler. By turning on RSC, you're authorizing the sharing of candidate, job, and application data across Recruiter and Dynamics 365 for Talent: Attract. It enables you to get up-to-date candidate information, boost collaboration, and access more applicant data in Recruiter and your ATS. See how to easily connect your two accounts on the next few pages.

Please note: Recruiter System Connect is only compatible with LinkedIn Recruiter Corporate or LinkedIn Professional Services. You will also need the Dynamics 365 for Talent Comprehensive Hiring Add-On to use RSC with Attract.

Save time now that you're connected

Connect at no additional cost

RSC is secure and GDPR compliant*

Easy setup for Admin

* To learn more about privacy, security, and GDPR compliance, download Security and Privacy Overview: LinkedIn Talent Integrations.
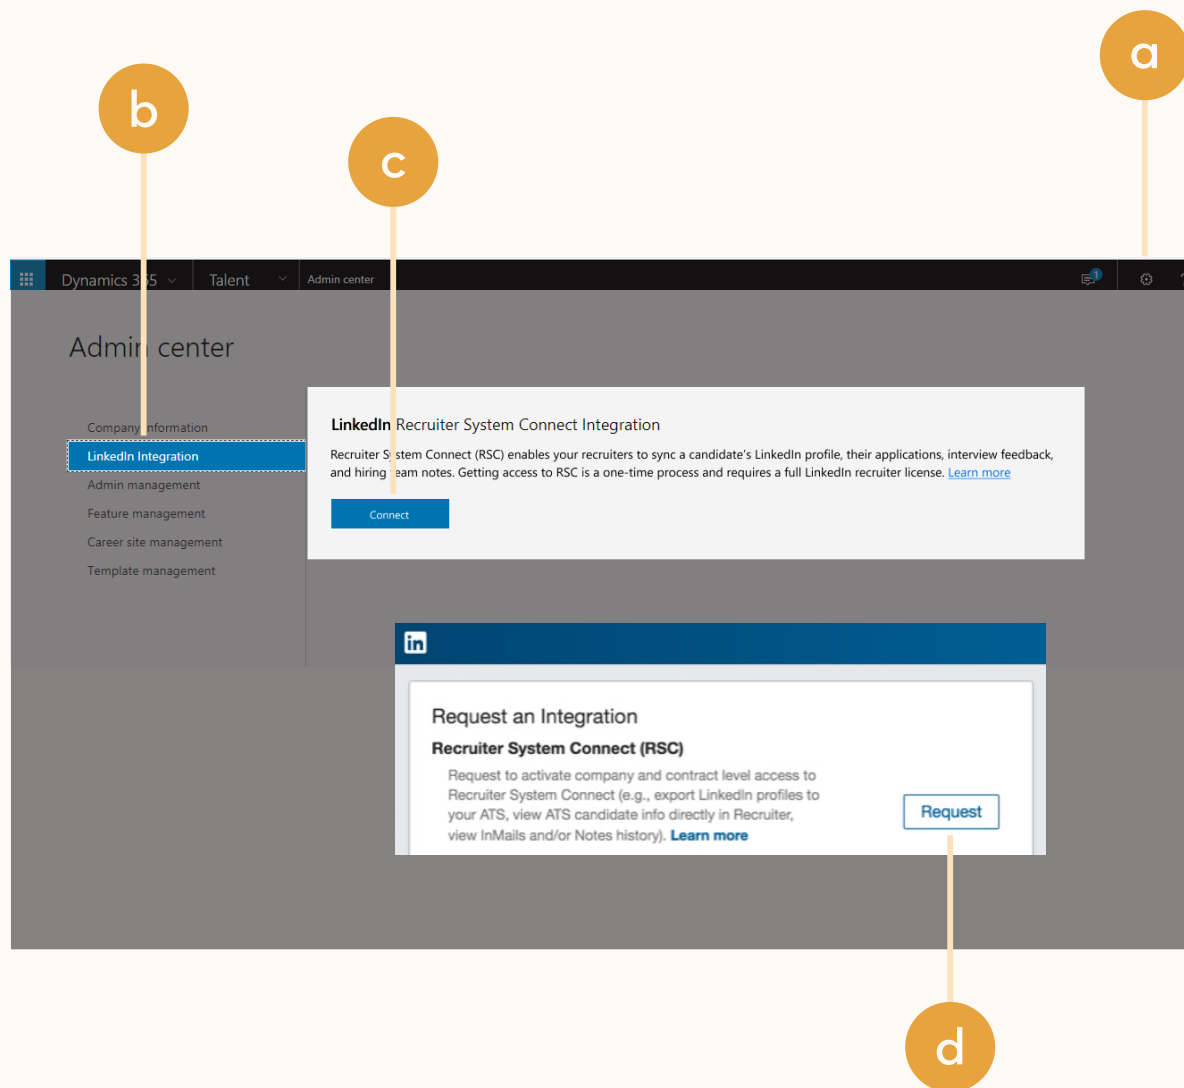

Step 1
Head into Dynamics 365 for Talent: Attract to begin setting up the integration.

Before you can connect your two systems, you must configure Contract Level Access or Company Level Access with your Attract instance. To complete the configuration process, you must work with the user who is an Admin on your Recruiter contract.

a Sign in to Attract as an Admin and go to **"Admin center"**

b Click the **"LinkedIn Integration"** tab

c Click **"Connect"** to start the setup and be guided through the LinkedIn sign-in process

d Click **"Request"** under the **"Recruiter System Connect"** section

After the integration is requested from Attract, it will show as **"Partner ready"** and is ready to be turned on from Recruiter Product settings. If you see **"Notify partner"** on this page, wait a few seconds, click **"Notify partner,"** then refresh the page. It should now show as **"Partner ready."**

in Recruiter | **■■ Microsoft**

Step 2
Connect LinkedIn Recruiter to Dynamics 365 for Talent: Attract.

a Click on your profile image in the top-right corner

b Select **"Product settings"** from the dropdown menu

c Click **"ATS integration"** on the left side of the screen

d Scroll to the Attract section

e Select **"Contract Level Access"** if you want to enable all Company Level Access features plus InMail history, Notes history, and the InMail stub profile access
