Your Guide to Innovative Recruiting

Beyond the Job Post:

Your Guide to Innovative Recruiting
Your success as a recruiter and a business is directly linked to your ability to hire great people. But today, being a rock-star talent professional means you have to go beyond traditional sourcing tactics like posting a job and praying that your purple unicorn will coming knocking on your door. So, how do you modernize your recruiting strategy to find more qualified candidates with less time and effort?

That’s where LinkedIn comes in.

We work behind the scenes – using the data from candidates’ behavior and work history to build smart algorithmic matches of their profile to your open job. The results are all available on our platform to deliver you the candidate you’ve been waiting for.

This ebook will cover some simple but clever ways to attract and narrow in on your perfect candidate.

**Why LinkedIn?**

LinkedIn is where 460+ million professionals come to connect, stay informed, and get hired. It’s the largest and fastest-growing social network for professionals. Every day, billions of interactions take place on the platform.

LinkedIn Talent Solutions is a suite of tools that helps you make sense of these interactions. It can support you in finding the candidates you need, building and maintaining relationships, and converting those relationships into long-lasting hires.
Before candidates can picture you as their next employer, they need to learn more about you and your organization to build trust and affinity. By investing in your professional and employer brand, you can open the door for employment discussions down the road. It has real bottom-line impact, too; organizations with strong employer brands spend less on hiring and have better employee retention.

Visiting profiles is the #1 activity on LinkedIn, which means your profile is often the first thing candidates seek out during their job hunt. The initial step is to make sure you have an authentic, complete profile that includes an engaging picture, descriptive headline, rich media to showcase your company, and highlighted long-form posts you’ve published.
The anatomy of a well-branded recruiting profile

**Show your expertise**
by publishing long-form posts

**Background**

**Showcase your company culture with rich media**
Once you’ve got your profile basics covered, it’s time to bring value as a thought leader. Curating existing content can be less time intensive than creating original content. Use SlideShare and LinkedIn’s publishing platform, Pulse, to discover quality content quickly, and use status updates to share jobs, articles, photos, and thoughts with your network.

When you’ve got something to say, writing posts is a great way to share your expertise with candidates and other professionals.
Why publish on LinkedIn?

The more quality and relevant posts you publish, the more people you’ll reach and the stronger both your professional and employer brands will become.

- 2x-3x referral traffic (with up to 7x for some of our top publishers)
- ~1,000 posts are shared every minute
- 100,000+ articles published every week
- Up to 300% uptick in publishers’ Company Page followers
- ~45% of readers are in the upper ranks of their industries: managers, VPs, CEOs, etc.
- Millions of professionals are creating content each week

~45% of readers are in the upper ranks of their industries: managers, VPs, CEOs, etc.
You likely already have a Company Page on LinkedIn (if you don’t, you can set one up for free). Use the Analytics tab on your Company Page to explore your follower demographics by function, industry, seniority, and company size. You can also see how many of your followers are current employees. Use this information to determine whether you’re attracting the right talent and how to better engage this audience – and then feature jobs most relevant to your visitors.

The next step is the premium Career Pages that lets you target your messaging and posted jobs to candidates based on things like location, industry, and function. These different page versions highly target specific groups of talent, such as engineers or sales.

You can analyze your follower demographics with these filters.
With your brand on the right track to attract the best talent, you’re ready to post your jobs – but not just post and hope for the best. Use search insights in LinkedIn Recruiter to help you quickly prioritize and identify quality talent.

After you enter your search criteria, search insights will reveal the talent pool’s current and past employers, years of experience, education, and location via intuitive, interactive bar charts.¹

1. Set effective search strategies
Top recruiters have the ability to analyze and understand talent pools, yet only 1/3 of recruiters say they have the tools they need to do this well. With search insights, you can get a deeper understanding of the talent market and identify the best talent pools to recruit from.

2. Manage hiring manager expectations
In a LinkedIn survey, 82% of recruiters said their hiring managers can have unrealistic expectations. Summarize market data to educate your hiring managers about the realities of any given talent pool. These insights will help you and your hiring manager determine, for example, whether you should expand your search to new markets or adjust the compensation or title.

3. Build rapport with candidates
Search insights can help you advise candidates on current market dynamics. For example, you can share data with candidates about what experience they’ll need for a role, which job markets are most competitive, or who the top employers are in a certain pool.

---

3 LinkedIn data
Discover who’s interested in something new

“Open talent” – a new category of talent who are cooler than “active” candidates, but warmer than “passive” ones – is easy to discover if you have the right tools.

Tap into this broader range of qualified candidates with three features that help connect recruiters and “open” LinkedIn members.

- **Apply Starters** enables you to reach the 75% of candidates who abandon applications
- **Contractor Targeting** allows you to refine your searches to candidates who have explicitly expressed interest in contract projects
- **Open Candidates** lets job seekers secretly signal that they’re open to new opportunities

Candidates who say they’re interested in contract work are nearly twice as likely to respond to recruiters – and 40% respond within the same day of receiving a message.

Candidates who abandon applications are often still interested in the role – and four times as likely to respond.

40% of global professionals are open to new opportunities.

4 2016 Global Talent Trends Report
Engage the right talent, automatically

We know you want your job to reach the right candidates. That’s why we automatically advertise your openings to relevant professionals based on the qualifications you’re looking for. Your target talent may see your LinkedIn job post at multiple points – as they browse their newsfeeds, view profiles, or check email.

Most LinkedIn job views come from our recommendations module called “Jobs You May Be Interested In,” not from active job searches.
Another way to reach candidates is through dynamic, targeted ads. The people who view your employees’ profiles are usually connected to your employees, and therefore more likely to be familiar with your organization and more open to your opportunities. Capture the attention of this talent by placing ads alongside your employees’ profiles. Here are three good options:

**Picture Yourself**
Invite candidates to picture themselves working at your company

**Follow Us**
Encourage viewers to follow your Company Page and stay informed

**Spotlight**
Flexible ad format gives you complete control with a customizable background
# MODERN RECRUITER CHECKLIST

## Summary

We know you’re busy, so we created a checklist with a breakdown of all you need to know from this ebook.
