Customer FAQs

1 Why can't I renew my contract with Job Posts?

We're constantly assessing our offerings to ensure we're providing the best solutions for our customers. In doing so, we discovered that Job Posts may not provide the best support for your hiring needs. As a response to this feedback, we've decided to discontinue Job Posts.

2 How will Job Slots work for me?

Job Slots are a convenient and cost-effective way to post and promote job openings to attract qualified candidates. You can rotate your job postings in and out of a Slot as many times as you need to, giving you the flexibility to find the right candidates for your roles.

The benefits of using Job Slots include:

Simplicity

Once you post your job, LinkedIn will take care of matching it to suitable candidates, saving you time and effort.

Efficiency

Rather than managing multiple job postings and budgets, you can easily swap out jobs for new ones once you've received enough applicants.

Predictability

With Job Slots, you know exactly how much you'll spend on all job postings for the duration of your contract, so you can plan your budget with confidence.

Overall, Job Slots are a useful tool for businesses looking to streamline their hiring process and find the right candidates for their open positions.

3 What should I expect as I migrate to Job Slots?

Job Posts will be removed from your dashboard, and Job Slots will become available. All active jobs are closed and will need to be reopened. Closed jobs can be found by filtering for "Closed" under the "Job status" filter.

4 What happens to my data? Where can I find it?

Your data will be conserved throughout the migration. Your candidate data can be found by first filtering for jobs that are "Closed" within the "Job status" filter and then selecting each job's candidate management dashboard. Historical spend data related to Job Posts will need to be requested through a support ticket.

5 What happens to my Job Posts budget?

We recommend you use the remainder of your budget to promote jobs before the end of your Job Posts contract. Please speak to your sales representative about your contract and rollover details.

Customer FAQs

6 Can I continue with Automated Job Postings and basic jobs for free?

Job Slots has a similar offering to Automated Job Postings called Job Wrapping, which allows you to post and promote jobs directly from your applicant tracking system. It can be purchased at the time of renewal for Job Slots. Job Wrapping must be enabled in order for Job Slots to have basic job posting functionality. To learn more about Job Wrapping, please visit our [Customer Learning center](#).

7 What's next for Job Slots?

There are many exciting features and enhancements in the works for Job Slots to help you hire more efficiently. We're working on an enhanced automation and posting experience to provide you with more data-driven recommendations and new ways to quickly identify the most-qualified candidates.
