Everything you need to get
quality applicants, fast.

LinkedIn Talent Solutions

The recruiting process doesn't control you. You control the process.

Recruiting is rewarding, but it can be overwhelming when you're managing a high volume of open requisitions. Among your action items, writing and posting job descriptions are usually the most time consuming and most neglected.

But job posts are a critical step in the recruiting process that cannot be overlooked. 84% of professionals are interested in hearing from recruitment firms about job opportunities, and 38% of these individuals research job opportunities each month*. The job post often sets a candidate's first impression of your recruitment firm and your client, which means you need to craft compelling job posts that get quality candidates to apply.

From checklists to templates, this digital Job Postings Toolkit is full of essential tools to help you quickly and smoothly manage the job posting process. These plug-and-play resources allow you to write and post jobs more efficiently, giving you back time to focus on other top priorities.

Prep for success

 **45 min** activity

You're strapped for time and want to jump straight to writing the job post – but don't get ahead of yourself. Doing some necessary pre-work will attract quality applicants and save you time in the long run.

Defining the position and the ideal candidate is the most critical step in the recruitment process. Not only will it help you focus, it will also streamline your search and ensure better communication with your clients and hiring stakeholders. Those who don't prepare in advance risk attracting unqualified applicants (and unhappy clients and hiring managers). Here are two resources to help you start strong.

The Job Spec Form

In your kick-off meeting with your clients and hiring stakeholders, use this form to identify what the role entails and what the ideal candidate looks like. Once you've completed the form, you'll have plenty of information to write the job description and deliver the right candidates. Your goal: know exactly what to look for in candidates before beginning your search.

The Client Questionnaire

In the same meeting, ask these questions to your client to get a deeper sense of their working style and their team. Your goal: ensure your candidates are cultural fits who complement the team needs. A secondary goal should be to familiarize yourself with the nuances of working with a particular client.

Write your job post

 **45 min** activity

Now that you have done your research, use it to write a compelling job description. Ultimately, you want an interested candidate to think you wrote the job description just for him or her.

Use this Job Post Template to get started. A good job description starts by sharing what's in it for the candidate, describes the role's impact, and explains what success looks like in the role. It helps to clearly list 4-6 bullet points about what the person will be doing in the role. Add skills and experience to attract more quality candidates. End your post with a brief overview of your client's company and why it's a great place to work (this is useful even if you can't mention your client's name). If you turn your job description into a narrative, you'll entice candidates to read and apply.

For inspiration, here are two real-life examples of stellar job posts. From senior to administrative, job postings are effective for most types of roles and seniority. See what makes these examples great and how you can apply similar tips to your job posts.
