

Explore the Next Generation of Recruiter

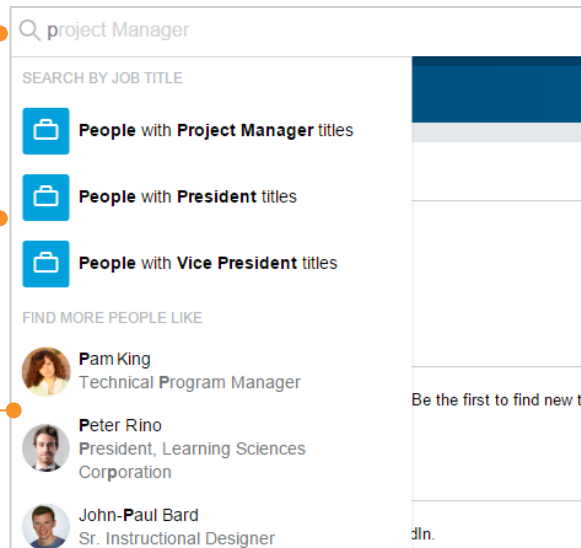

The next generation of Recruiter will empower you to go from searching to hiring in less time. This improved experience enables you to **search faster** with a simpler and more intuitive interface, **uncover hidden talent** with smart suggestions leveraging LinkedIn's unique data to let you expand and refine your search in new ways, and **prioritize warm leads** with spotlights to help you easily filter results for candidates who are more likely to engage, based on relationships and interactions with your company on LinkedIn.

Search faster

Search by a job title, ideal candidate, or with Boolean modifiers.

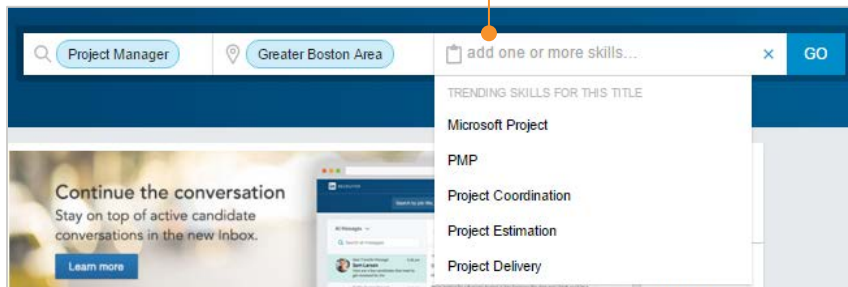

Select from suggested job titles to structure your search

'Find more people like' your ideal candidate

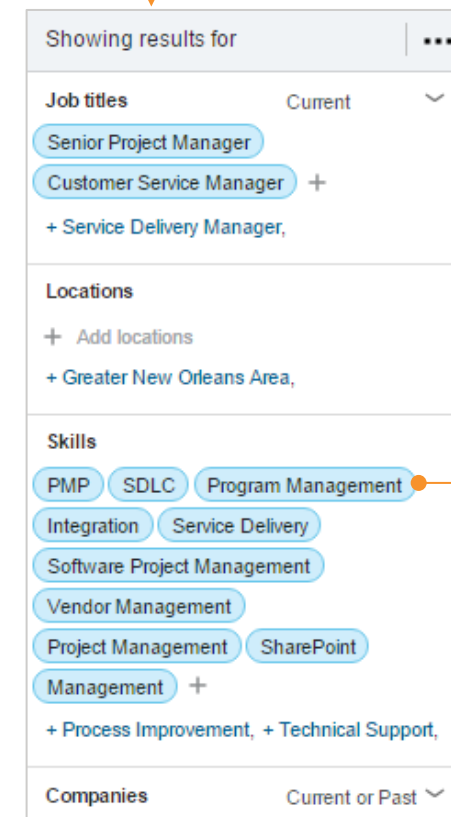

Suggested skills guide your search

Enter as many skills as you need to tailor your search or choose from the top skills that are trending for the job title.

Find more people like...

Search fields are automatically populated based on your ideal candidates' key attributes.

See what criteria went into the search, and edit directly as you see fit.

Uncover hidden talent and prioritize warm leads

Identifying all of the requirements for a role and translating that into a search can be difficult. The next generation of Recruiter suggests additional job titles, skills, companies, and more based on the information you have already provided. Spotlights help you prioritize results for professionals that are more likely to engage with your role and company, based on LinkedIn's unique relationship insights.

Save a search, custom filter, and view search insights.

Spotlights allow you to easily filter results for candidates who are likely to respond favourably to outreach from your company.

Dynamically edit your search from within the search results page.

Smart suggestions offer additional search criteria you may not have considered to help you expand or refine your search.

Access all the advanced search filters.

The screenshot shows the LinkedIn Recruiter search interface. On the left is a sidebar with search filters: Job titles (Project Manager, Senior Project Manager), Locations (San Francisco Bay Area, Washington D.C. Metro Area), Skills (Microsoft Project, PMP, PMI, PMO, PMBOK), Companies (Hewlett Packard Enterprise), Schools (Stanford University), Industries (Information Technology and Services), and Keywords. The main area displays search statistics: 7.9K total candidates, 3.1K have company connections, 2 past applicants, and 1K engaged with your Talent Brand. Below this is a list of results for '7,890 results • Sorted by relevance'. Three candidate profiles are shown: Alex Becker (Senior Technical Project Manager at Logitech), River Allison (Program Manager at First Republic Bank), and Ali Norman (VP Software Engineering at Knightscope, Inc). Each profile has a 'Save to project' button and a menu of actions like 'Send InMail', 'Add to clipboard', 'Add note', 'Share profile', 'Update me', and 'Find more people like'. A 'View more' button is at the bottom of the sidebar.

Spotlights vary based on different types of relationships and interactions on LinkedIn. Click to access all spotlights.
