Introducing Recruiter System Connect

LinkedIn Recruiter System Connect (RSC) integrates LinkedIn Recruiter with your Lever account to make your hiring process even simpler. By turning on RSC, you're authorizing the sharing of some candidate, job, and application data across Recruiter and your ATS. It enables you to get up-to-date candidate information, boost collaboration, and access more applicant data in Recruiter. See how to easily connect your two accounts on the next few pages.

Please note: Recruiter System Connect is only compatible with LinkedIn Recruiter Corporate or LinkedIn Professional Services.

* To learn more about privacy, security, and GDPR compliance, download [Security and Privacy Overview: LinkedIn Talent Integrations](#).

Lever

In your Lever account, navigate to Settings > Integrations. Under **“PARTNER INTEGRATIONS”**, enable Recruiter System Connect.

The toggle button will turn orange, and the row will expand.

Lever

Click **“BEGIN SETUP”** to get started.

If you're not already signed in to your LinkedIn account in your browser, enter your LinkedIn credentials and select your Recruiter contract.

Lever

The screenshot shows a LinkedIn integration request interface. At the top left is the LinkedIn logo. The main heading is "Request an Integration". Below it is the section "Recruiter System Connect (RSC)" with a description: "Request to activate company and contract level access to Recruiter System Connect (e.g., export LinkedIn profiles to your ATS, view ATS candidates info directly in Recruiter, view InMails and/or Notes history). [Learn more](#)". A "Request" button is positioned to the right of this section. Below the RSC section is the "Apply Starters Explorer" section with a description: "Enable to display a list of job seekers who started to apply to your jobs by clicking on Apply with LinkedIn, but didn't finish your application. [Learn more](#)". A "Partner ready" button with a warning icon is positioned to the right of this section. At the bottom left is a "NEXT" button. Blue lines connect the "Request" button to the text on the right, the "Partner ready" button to the text on the right, and the "NEXT" button to the text on the right.

Then request access by clicking the **“Request”** button. Once access has been confirmed, the button will show as **“Partner ready”**.

Click **“NEXT”**.

Lever

Next, you'll enable the integration. First, click **“ENABLE IN LINKEDIN”**. This will open a new tab and direct you to the settings section of LinkedIn Recruiter.

LinkedIn Recruiter

From there, select the appropriate contract, select the **“ATS”** tab, and enable both the Company Level and Contract Level access toggles.

Lever

Once you've enabled both, you can close the LinkedIn Recruiter tab and navigate back to Lever. Now, click **“CHECK INTEGRATION STATUS”**. The status will change to enabled. Click **“NEXT”**.

Lever

The screenshot shows the 'LinkedIn - Recruiter System Connect (RSC)' interface. At the top, there is a progress bar with four steps: 1. REQUEST ACCESS, 2. ENABLE INTEGRATION, 3. LINK SEATS (highlighted), and 4. SYNC DATA. Below the progress bar, a heading reads: 'Match Lever users to their LinkedIn Recruiter seats to ensure that inMails and notes are properly attributed within Lever.' The main content is a table with two columns: 'LINKEDIN SEAT' and 'LEVER USER'. The table lists several LinkedIn seats with their corresponding email addresses and a 'CHOOSE' dropdown menu for mapping them to a Lever user. A blue arrow points from the 'CHOOSE' dropdown for 'Jean Tocco' to the right-hand text.

LINKEDIN SEAT	LEVER USER
Jean Tocco JeanTTocco@demo.com	CHOOSE
Lupita Fillmore LupitaFillmore@demo.com	CHOOSE
Daniel Porter dan.porter@demo.com	CHOOSE
Dawn Burrow d.burrow@demo.com	CHOOSE
Peter Barone	CHOOSE
Brandon Morales brandon.m@demo.com	CHOOSE
Tamera Johnson tam.johnson@demo.com	CHOOSE
Elva Rockett	CHOOSE

Match the LinkedIn user on the left to their Lever seats using the dropdowns.

You can always come back and add new mappings, or change existing mappings. Once done, click **“DONE LINKING SEATS”**.

Now you're all set to begin the historical data sync. This typically takes less than 30 minutes, but it can take longer for accounts with a large number of candidate records. You won't be able to use the integration until the sync is complete, but you're free to navigate away from the page. You'll be notified when the sync is complete.

Lever

The screenshot shows a web interface for 'LinkedIn - Recruiter System Connect (RSC)'. At the top left, there is a toggle switch that is turned on. Below the title, a progress bar shows four steps: 1. REQUEST ACCESS, 2. ENABLE INTEGRATION, 3. LINK SEATS, and 4. SYNC DATA. Step 4 is currently selected and highlighted with a blue underline. Below the progress bar, the text reads: 'Sync your historical data between Lever and LinkedIn in order to start using RSC.' In the center of the page is a large blue button labeled 'BEGIN SYNC'. Below this button, the text says: 'Status will be shown here as your data syncs. This may take up to 2 hours.'

Once you're ready to start, click **"BEGIN SYNC"**.

If there are errors in the sync, you will be able to click **"RETRY"**. If the problem persists after a few attempts, please [submit a support request to Lever](#) and they'll investigate further.

With LinkedIn Recruiter and Lever working together:

Get the same candidate data in both Lever and Recruiter, saving you time and keeping you up to date wherever you're working.

View a candidate's LinkedIn profile with Lever and easily see which candidates are already in your Lever account.

See all Recruiter notes and InMail messages in Lever for a complete view of your candidate interactions.

When a candidate responds to an InMail messages, a profile is created within Lever.
