# Spend more time on people, not process.

Discover the one integration suite that can save your team time so you can focus on what matters most — hiring the right people.

## Save time

Quickly access all the information you need without switching between platforms.

## Hire qualified candidates

Attract the most qualified candidates and move them through the hiring funnel faster.

## Make informed decisions

Strengthen your hiring strategy with relevant candidate insights and data-driven reports.

**Pricing:** LinkedIn ATS Integrations are provided by LinkedIn at no additional cost if you hold a full Recruiter seat. Some ATS providers may charge a fee for certain integrations.

# Integrations for all of your hiring needs

LinkedIn ATS Integrations help you stay efficient at every stage of the hiring process.

## Sourcing package

Work seamlessly across Recruiter and your ATS to find qualified candidates faster.

### Recruiter System Connect

Connect your ATS to LinkedIn Recruiter to access information when and where you need it, without having to switch between platforms.

### Unified Search

Search and message candidates across both your ATS and the LinkedIn network directly from your ATS.

### Recommended Matches

Discover candidate recommendations based on job descriptions you post in your ATS.

## Reporting package

Understand your sourcing and hiring activities across your entire funnel.

### ATS-Enabled Reporting

Gain insight across your end-to-end hiring funnel to optimize where you spend your time and to understand the value of all your sources, including LinkedIn.

## Apply package

Streamline the job posting and application processes so you can focus on the most qualified candidates.

### Apply Connect

Attract more applicants with a seamless candidate experience and real-time job postings, then use insights to evaluate applicants in your ATS.

### Apply with LinkedIn

Let candidates apply to jobs on your career site using their LinkedIn profile information.

Whatever stage your candidates are at, LinkedIn ATS Integrations can move them through the funnel faster with these packaged solutions.

## Sourcing package

### Recruiter System Connect – [Get started](#) ↓

- ✓ Identify which candidates are already in your ATS when searching in Recruiter
- ✓ Filter LinkedIn searches by existing ATS candidates
- ✓ Access ATS candidate history and status on Recruiter profiles
- ✓ Export limited LinkedIn profiles to your ATS
- ✓ View real-time LinkedIn profile information for candidates in your ATS
- ✓ Send messages and view LinkedIn Notes and InMail from within your ATS

### Unified Search – [Get started](#) ↓

- ✗ Search candidates across both your ATS and the LinkedIn network directly from your ATS

### Recommended Matches – [Get started](#) ↓

- ✗ Get LinkedIn candidate recommendations for jobs in your ATS

## Reporting package

### ATS-Enabled Reporting – [Get started](#) ↓

- ✓ Optimize your strategy with full-funnel activity insights from the Hiring Funnel Report
- ✓ Evaluate different candidate sources with the Source Report
- ✓ Understand the impact of your LinkedIn activity with LinkedIn Touch Attribution
- ✓ Use industry benchmarks to compare against industry peers

## Apply package

### Apply Connect – [Get started](#) ↓

- ✗ Post jobs from your ATS to LinkedIn in real time
- ✗ Allow candidates to apply to jobs from any device without leaving LinkedIn
- ✗ Get applications from LinkedIn delivered directly to your ATS
- ✗ Incorporate screening questions from your ATS into your LinkedIn applications
- ✗ View real-time LinkedIn profiles and applicant insights in your ATS
- ✗ Receive LinkedIn skills data about applicants
- ✗ Send application status updates to candidates with automated notifications

### Apply with LinkedIn

- ✓ Let candidates apply to jobs on your career site using their LinkedIn profile information

Sourcing package

# Recruiter System Connect (RSC)

Connect your ATS with LinkedIn Recruiter to access candidate information, boost collaboration, and view more applicant data in both Recruiter and Workday without having to switch between platforms.

- Get the same candidate data in both Recruiter and Workday, saving you time and keeping you up to date wherever you're working
- View a candidate's LinkedIn profile with Workday and easily see which candidates are already in Workday from Recruiter
- See all Recruiter notes and InMail messages in Workday for a complete view of your candidate interactions
- Automatically create or update a profile within Workday when a candidate responds to an InMail message
- Activate RSC to pave a path for easier activation of other powerful LinkedIn ATS Integrations.

Save time now that you're connected

Connect at no additional cost

RSC is secure and GDPR compliant

Easy setup for administrators

## Step 1 of 5 Activate RSC in Workday.

- a Launch **“Edit Tenant Setup Recruiting”** task to enable LinkedIn Recruiter System Connect.
- b Click **“Configure LinkedIn Integrations”** to initiate the setup.
- c Accept the **“Terms & Conditions Agreement.”**

c

## Step 2 of 5 Set up integration in Workday.

- a** Admins can request to activate integrations all at once — across all packages — inside the onboarding widget.\*\*

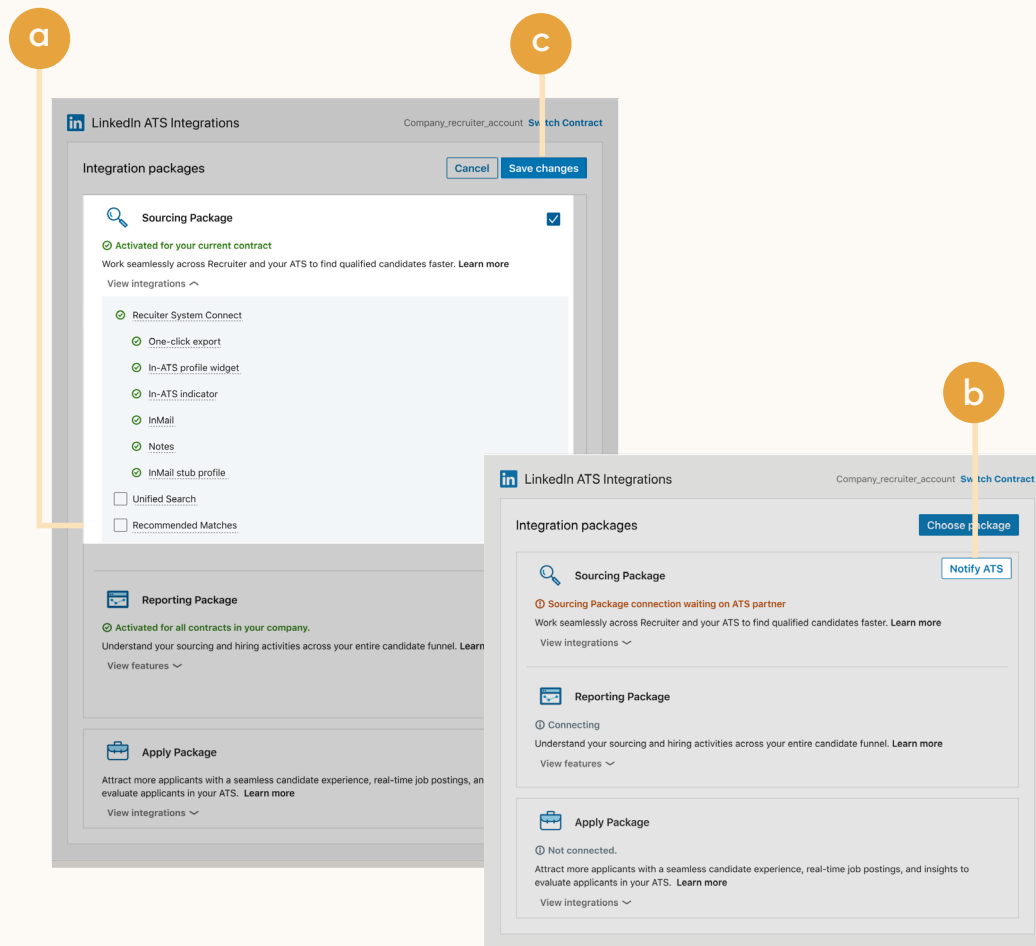

**Please note:** Default access level is contract level for sourcing packages versus company level for reporting and applicant management packages.

- b** (Optional) Connection not moving fast enough? Nudge partners with a notification. (For troubleshooting, check the next page.)

- c** Hit **“Save changes”** to confirm integration activation. Your integrations will be turned on at this point.

\*Check with your ATS to ensure all features are enabled for you.

\*\*If an integration package or feature is grayed out, it's either because your ATS is not offering it at this time or you don't have the permission to adjust this package. Check with your ATS to ensure all features are enabled for you or to request an integration.

## Step 2 (Cont.) Troubleshooting

- Change your browser settings to accept cookies.
- Clear apps in both LinkedIn and Workday, and then restart configuration.
- Allow time for data syncing (approximately 20 minutes on average), and then check back on activation status.
- Please note that you may not be an Admin for the contract or have authorization to access the LinkedIn dashboard.

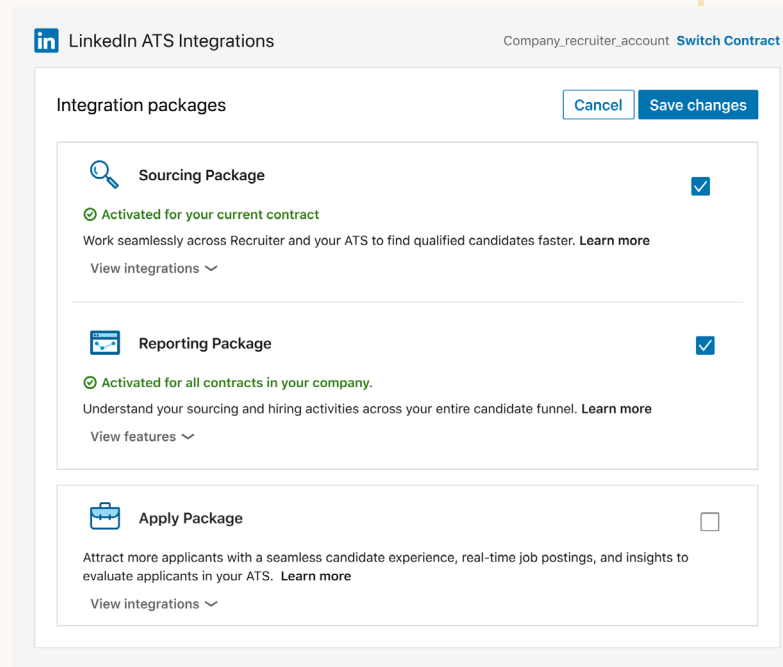

## Step 3 of 5 RSC is enabled in Workday.

- a Navigate back to Workday where you will see that RSC is **“Activated in your current contract.”**
- b Finish setting up the integration by reviewing the configuration steps in the [Workday Admin Guide](#). Follow the steps outlined under **“Setup LinkedIn Recruiter System Connect Integration.”** Only upon completing and scheduling the **“Inbound & Outbound Integrations”** will there be a data sync between Workday Recruiting & LinkedIn Recruiter.

You may test your RSC integration by referring to this [Preview Guide](#). You will need to reactivate and reconfigure the RSC integration each time you move from a test environment to another environment (i.e., Preview → Sandbox → Production), including from one test environment to another test environment.

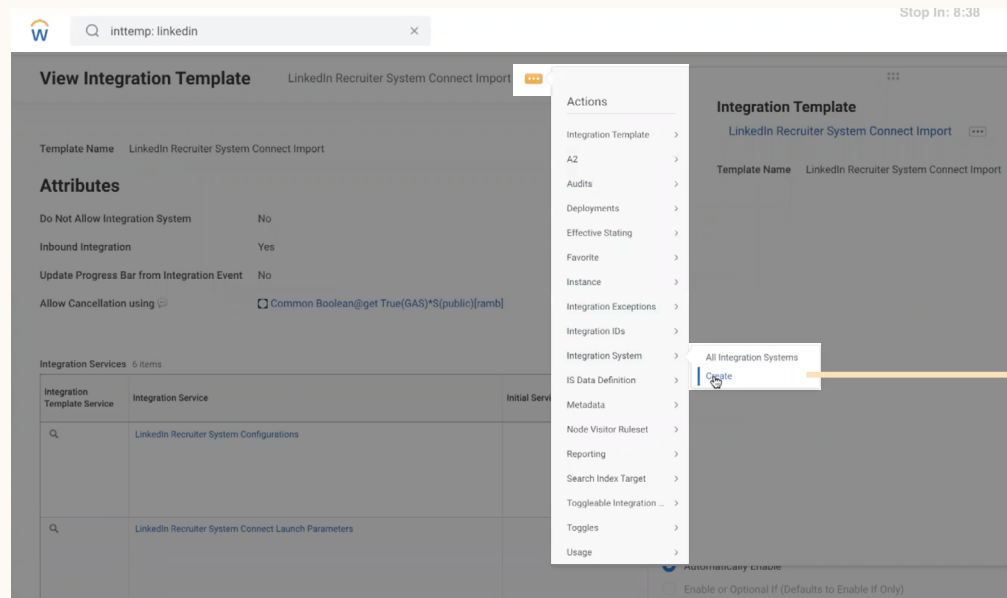

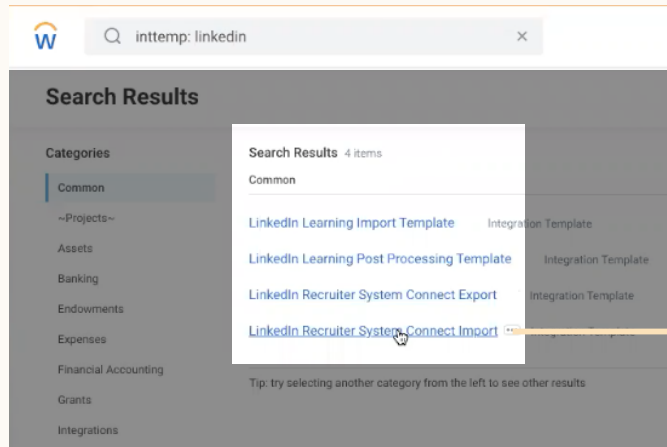

LinkedIn ATS Integrations → Sourcing → **Recruiter System Connect**

## Step 4 of 5 Set up import integrations.

- a Search for “inttemp: linkedin” and select **“LinkedIn Recruiter System Connect Import.”**
- b Click on “...” to reveal the Actions menu, then go to **“Integration System > Create.”**

LinkedIn ATS Integrations → Sourcing → **Recruiter System Connect**

## Step 4 (Cont.) of 5 Set up import integrations.

- c Add a System Name and click “OK.”
- d Return to the “...” Actions menu and go to “Integration System > Configure Integration Attributes.”

LinkedIn ATS Integrations → Sourcing → Recruiter System Connect

The image shows two screenshots of the LinkedIn ATS Integrations interface. The top screenshot is the 'Create Integration System' form, where a system name 'LI Import Demo 1' has been entered. An orange circle labeled 'c' points to the 'OK' button at the bottom. The bottom screenshot shows the 'View Integration System' page for 'LI Import Demo 1'. An orange circle labeled 'd' points to the 'Configure Integration Attributes' option in the 'Integration System' dropdown menu. The 'Basic Details' section shows the system name and ID. The 'Integration Services' section lists various services, including 'LinkedIn Recruiter System Connect Import / LinkedIn Recruiter System Configurations'.

Step 4 (Cont.) of 5  
Set up import  
integrations.

- e Copy the attributes value under “LinkedIn Recruiter System Configurations,” then select “Override default values” and paste that value in the LinkedIn Recruiter System Configurations “Value” field.
- f Click “+” in the “LinkedIn Recruiter Import Integration Attributes” and “Integration Document Retention” sections, then select the contract you are setting up.

| Attribute Provider  | Attribute                                  | Description  | Options             | Override Default Values             | Value   |
|---|--|--|---------------------|-------------------------------------|---|
| LinkedIn Recruiter System Configurations                        | LinkedIn Recruiter System Connect Site URL | The URL for the LinkedIn Recruiter System Connect Service.                           |                     | <input checked="" type="checkbox"/> | <div><div>+</div><div>https://api.linkedin.com/v2/</div><div>-</div></div>                          |
| LinkedIn Recruiter System Connect Import Integration Attributes | LinkedIn Contract ID                       | Reference to an active LinkedIn Recruiter contract that has been enabled in Workday. | Required for Launch | <input type="checkbox"/>            | <div><div>+</div><div><div>urn:li:contract:236302461</div><div>Search</div></div><div>-</div></div> |
| Integration Document Retention                                  | Document Retention Policy                  | Specify the duration (in days) that integration output should be available for       | Required for Launch | <input type="checkbox"/>            | <div><div>+</div><div></div><div>-</div></div>  |

OK

Cancel

## Step 4 (Cont.) of 5 Set up import integrations.

**g** Go to **“Actions > Integration System > Launch /Schedule.”**

**h** Enter your Integration and Run Frequency, then click **“OK.”**

**Note:** We recommend running this integration in yearly increments.

**Note:** Every system based on the import template can be configured with only one LinkedIn contract. If you have multiple contracts, you need to create multiple integration systems in Workday and configure each individual system.

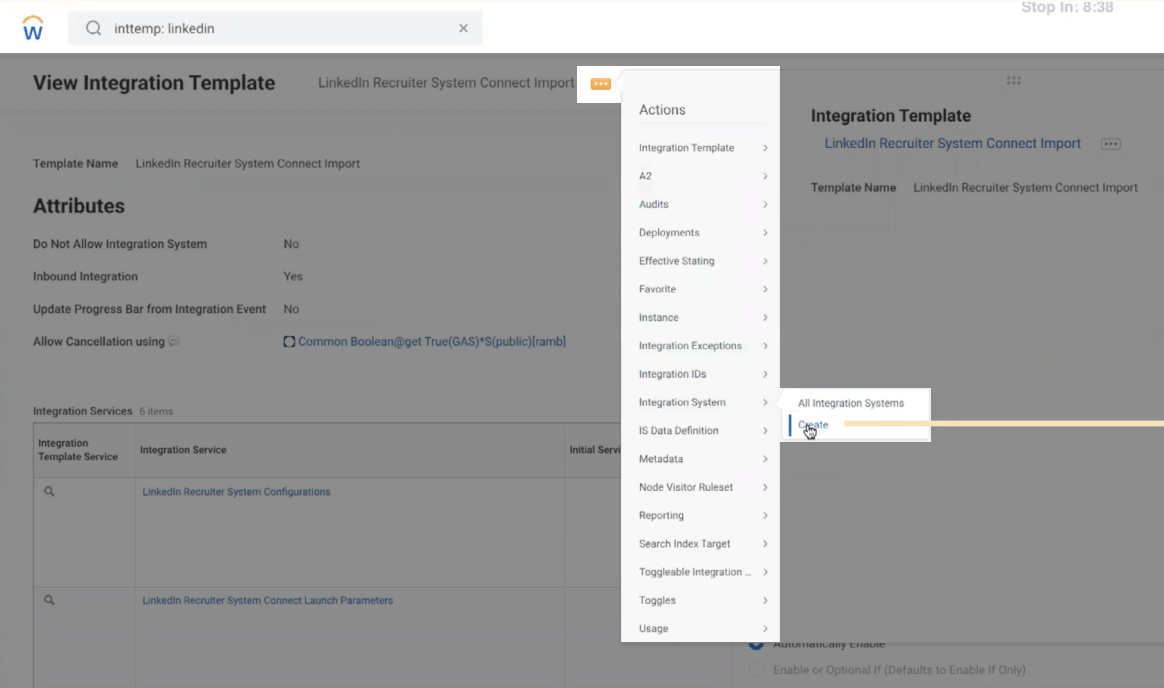

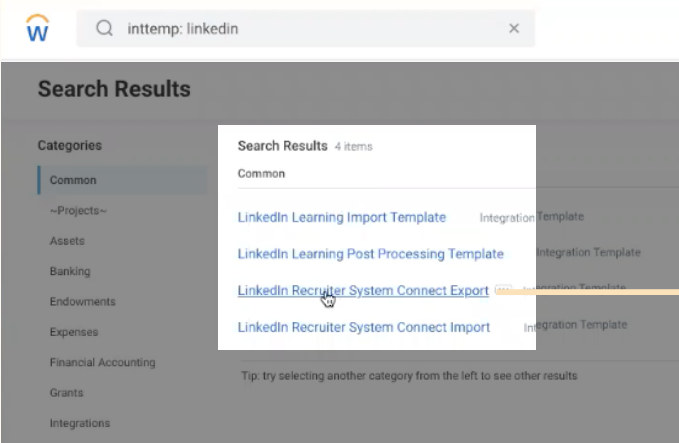

LinkedIn ATS Integrations → Sourcing → Recruiter System Connect

The screenshot displays the Workday interface for configuring an integration system. On the left, the 'View Integration System' page for 'LI Import Demo 1' is visible, showing 'Basic Details' and a list of 'Integration Services'. The 'Actions' menu is open, with 'Launch / Schedule' selected. On the right, the 'Launch / Schedule Integration' dialog is shown, featuring fields for 'Integration' (set to 'LI Import Demo 1'), 'Organization', and 'Run Frequency' (set to 'Run Now'). The 'OK' button is highlighted, and an orange circle with the letter 'g' is positioned below the dialog. An orange circle with the letter 'h' is positioned above the 'Run Now' button.

Step 5 of 5  
Set up export  
integrations.

- a Search for “inttemp: linkedin” and select “LinkedIn Recruiter System Connect Export.”
- b Click on “...” to reveal the Actions menu, then go to “Integration System > Create.”

LinkedIn ATS Integrations → Sourcing → Recruiter System Connect

## Step 5 (Cont.) of 5 Set up export integrations.

- c Add a System Name and click “OK.”
- d Return to the “...” Actions menu and go to “Integration System > Configure Integration Attributes.”

LinkedIn ATS Integrations → Sourcing → Recruiter System Connect

## Step 5 (Cont.) of 5 Set up export integrations.

**h** Go to **“Actions > Integration System > Launch / Schedule.”**

**i** Enter your Integration and Run Frequency, then click **“OK.”**

**Note:** We recommend running this integration in yearly increments.

**Note:** Every system based on the import template can be configured with only one LinkedIn contract. If you have multiple contracts, you need to create multiple integration systems in Workday and configure each individual system.

LinkedIn ATS Integrations → Sourcing → Recruiter System Connect

The screenshot displays the Workday interface for configuring an integration system. The main panel shows the 'View Integration System' page for 'LI Import Demo 1'. The 'Basic Details' section includes the 'System ID'. The 'Integration Services' section lists several services, including 'LinkedIn Recruiter System Connect Import / LinkedIn Recruiter System Configurations'. The 'Actions' menu is open, showing options like 'Integration System', 'Audits', 'Business Process', 'Contextually Secured', 'Deployments', 'Effective Stating', 'Favorite', 'Instance', 'Integration', 'Integration IDs', 'IS Data Definition', 'Node Visitor Ruleset', 'Process', 'Reporting', 'Reports', 'Search Index Target', 'Security Profile', 'Solution', and 'Translation'. The 'Integration' option is selected, and the 'Launch / Schedule' sub-option is highlighted. To the right, the 'Launch / Schedule Integration' dialog is visible, showing the 'Integration' field set to 'LI Export Demo 1', the 'Organization' field, and the 'Run Frequency' set to 'Run Now'. The 'OK' button is highlighted with an orange circle and the letter 'h'.

## Step 5 (Cont.) of 5 View your reports.

- a Go to the “**Configure Profile Group**” template and add “**LinkedIn Data for Candidate Profile**” as your Profile Group, then click “**OK.**”
- b Select the “**Display in Profile**” option.
- c Add any existing reports by clicking the “**+**” button and selecting “**Allowed Reports > LinkedIn Profile**” and “**Allowed Reports > InMail History.**”

LinkedIn ATS Integrations → Sourcing → **Recruiter System Connect**

The image shows three sequential screenshots of the 'Configure Profile Group' dialog box in Workday, illustrating the steps to configure the profile group for the 'LinkedIn Data for Candidate Profile'.

- Step a:** The 'Profile Group' dropdown menu is open, showing 'LinkedIn Data for Candidate Profile' as the selected option.
- Step b:** The 'Display in Profile' checkbox is checked, indicating that the profile group will be displayed in the candidate profile.
- Step c:** The 'Allowed Reports' dropdown menu is open, showing a list of reports including 'Allowed Reports', 'Allowed Custom Reports', and 'Allowed Custom Tasks'. The 'Allowed Reports' option is highlighted.

Sourcing package

# Unified Search

Save time by searching and sourcing from Workday and LinkedIn simultaneously. Access Workday candidate records not found on LinkedIn and explore LinkedIn outside your ATS, covering all your bases. Save candidates to a job and send InMail messages without leaving Workday.

**Note:** You must activate [Recruiter System Connect \(RSC\)](#) to integrate Unified Search.

**✗ This integration currently isn't available with Workday.**

**Want this integration?** Reach out to your Workday rep.  
Or, you can [let us know](#) you're interested in this integration.

Save time with less searching

Find candidates across networks

Engage directly from Workday

Sourcing package

# Recommended Matches

Let LinkedIn do the work for you. Discover candidate recommendations based on job descriptions you post in your ATS. Save your favorite candidates, send them InMail messages, and easily archive candidates from your ATS. Matches continually improve with each use.

**Note:** You must activate [Recruiter System Connect \(RSC\)](#) to integrate Recommended Matches.

✕ **This integration currently isn't available with Workday.**

**Want this integration?** Reach out to your Workday rep. Or, you can [let us know](#) you're interested in this integration.

Get automatic recommendations

Discover qualified candidates faster

Engage directly from Workday

Reporting package

# ATS-Enabled Reporting

Gain insight across your end-to-end hiring funnel to optimize where you spend your time and understand the value of all your sources, including LinkedIn. This integration is available for any customer who has activated RSC.

Gain more actionable insights

Discover valuable sources

Make more informed decisions

Step 1 of 2  
Set up ATS-Enabled  
Reporting in Workday.

- a Launch “**Edit Tenant Setup Recruiting**” task to enable LinkedIn Recruiter System Connect.
- b Click “**Configure LinkedIn Integrations**” to initiate the setup.
- c Accept the “**Terms & Conditions Agreement**.”

Reduce candidate drop-off

## Optional step

Adjust your access settings in Recruiter.

- a Open your LinkedIn Recruiter Admin account in a new tab.
- b Scroll down to your Workday section.
- c Connect “**Contract Level Access**,” “**Company Level Access**,” or both by clicking “**On**” for the desired access.
- d Activate the InMail Stub Profile API to create or update profiles in your ATS when a candidate consents to share their contact information with your company via InMail.

The screenshot displays the LinkedIn Recruiter Admin interface. The top navigation bar includes the 'Recruiter' tab, 'Projects', 'Jobs', and 'Reports' links, along with a search bar and user profile. The left sidebar contains 'Company Settings' (Usage overview, Job posting, Preferences), 'Recruiting Settings' (Tags, Custom fields, Message templates, Custom pipeline), and 'Advanced' (ATS integration). The main content area shows the 'ATS Integration' settings for a Workday application (ID: 01234567). It includes sections for 'Contract Level Access', 'Company Level Access', and 'RSC advanced settings'. The 'Contract Level Access' and 'Company Level Access' sections each have a toggle switch set to 'On'. The 'Inmail stub profile API' section also has a toggle switch set to 'On'. Callouts 'a' through 'd' are placed over the interface to guide the user through the steps.
