

Just one post can
deliver the perfect hire

Post a job for 30 days to
more than 400 million professionals

You want better hires.

LinkedIn automatically shares your job with the most qualified candidates, even if they're not actively looking for a new role. When you have an important role to fill, LinkedIn can help you find the perfect match for your business, faster.

You want to spread the
word about your open role.

With over 400 million members, LinkedIn is the world's largest professional network and the best place to get your job in front of the right people. Share your job with more candidates than on any other platform.

You want to simplify
the way you hire.

Easily manage and communicate with applicants. Understand what talent you're attracting by seeing who's viewing and applying for your position.

How it works

Post

your job for 30 days. Automatically promote your role to people who match the job description.

View

all of your applicants' LinkedIn profiles. Filter applicants by location, experience level, role, and more.

Track

who's looking at your jobs, who's applying, what their skills are, and what companies they've been working at.

3 tips to get more and better applicants

Use a common job title. Make your title findable by sticking to standard, straightforward titles. If you use a common title, we'll have an easier time matching it to the right people and job seekers will be more likely to find it.

Share, share, share. Jobs employees share get 30% more applications. Anytime you post a job, share it on LinkedIn and other social networks. Expand your reach by asking your coworkers to share it too.

Link your job to your company page. Jobs linked to a LinkedIn company page get 59% more views. Select your company name from a drop down to connect your job post to your LinkedIn Company Page.

At the end of the day, it's all about having access to the right people. Every time I get an applicant from LinkedIn, I am optimistic.
