

## LinkedIn Talent Hub for Hiring Managers

LinkedIn Talent Hub is the only ATS that allows customers to **source, manage & hire** on a single platform. This means you can fill open headcount alongside your recruiting team in more efficient ways than ever. Talent Hub consolidates your various engagements across the hiring process to streamline your workflow when reviewing and providing feedback on candidates, so you can build your winning team faster.

Connecting your LinkedIn profile with Talent Hub will not allow your company to see any personal LinkedIn information (ex. InMails) and only allows your company to send Talent Hub notifications (ex. interview invitations) to your corporate email.

You'll be  
invited via  
email to join  
the platform  
soon!

Designed to make your role as a Hiring Manager easier:

### 1. Pipeline Visibility

A recruiter can share a whole project of candidates within Talent Hub so you can easily view your pipeline from sourcing all the way to hiring.

### 2. Profile Sharing

A recruiter can share multiple candidate profiles at once so you can easily rate the candidate's profiles ahead of selecting for interviews.

### 3. Real-time Collaboration

@mentions can be used to communicate directly with your recruiting team when leaving notes on a candidate.

### 4. Scorecards

Easily rate and gather feedback on candidates after interviewing using scorecards when deciding who to move forward with.
