

EVERWISE

LinkedIn Learning Integration Guide

In order to activate Everwise's LinkedIn Learning integration for your organization, please follow the following steps:

1. Purchase LinkedIn Learning for your organization directly from LinkedIn.
2. Request LinkedIn Learning API access by creating a client and secret key in the LinkedIn Learning Admin Settings, as described [here](#).
3. Securely email the client ID and secret key to Everwise's Professional Services team at services@geteverwise.com, so that they can activate LinkedIn Learning for your organization.
4. Once activated, LinkedIn Learning content will automatically start to appear across the platform. Your users can immediately start interacting with the content.

Single Sign On (SSO)

If you choose to use LinkedIn's SSO option in the LinkedIn Learning Admin Settings, the Everwise platform will automatically respect this option and serve your users SSO URLs instead of regular URLs.

Termination or change of API client

If the LinkedIn Learning API client stops working for any reason, the Everwise platform will automatically hide all LinkedIn Learning content from the platform. In that case, please follow the previously listed integration steps again to re-enable the content. No data will be lost.

Questions

If you have any questions regarding this integration, please reach out directly to services@geteverwise.com and we'd be happy to help you.
