## Spotlight Features

# Create your own custom library

Your content is hosted alongside LinkedIn Learning courses, providing learners one place to easily search for content of interest

1. **Upload** your own videos and documents, or add links to online public resources outside LinkedIn Learning
2. **Tag** your content with skills and labels, so learners can easily search and discover it
3. **Track** progress and completion within reports

Visit the Help Center to learn more about [supported file formats for custom content](#).

The screenshot shows the LinkedIn Learning platform interface. At the top, there is a navigation bar with the LinkedIn Learning logo, 'People', 'Content', 'Reports', and a search bar. Below the navigation bar, there are tabs for 'Featured', 'Learning paths', 'Collections', 'Custom content' (which is currently selected), and 'Tags'. A sub-header 'Custom Content (221)' is displayed, with a note: 'Add your own videos, documents or links for a more customized learning experience. [Learn more](#) about supported format types'. Below this, there are two buttons: 'Add content' and 'Add content ▾'. Under the 'Custom content' tab, there are two sections: 'Library (3)' and 'Content queue (218)'. A filter bar at the bottom of this section includes 'Filter by: Content type: (0) ▾', 'Skills: (0) +', 'Tags: (0) +', 'Added by: Me ▾', 'Order by: Newest ▾', and a search bar 'Search for custom content' with a magnifying glass icon. Below the filter bar, it says 'Active Filters: Me X'. At the bottom right, there is a 'Views' section with a grid icon. The main content area displays three items: 1. A 'LINK' item titled 'Why diverse teams are smarter' from 'hbr.org', with a video duration of 20m. 2. A 'VIDEO' item titled 'Effective organizational management' from 'twitter.blog.com', with a video duration of 20m. 3. A 'VIDEO' item titled 'Twitter's CEO on Transformation' from 'twitter.blog.com', with a video duration of 20m.

# 72%

of employees say they would be motivated to engage with relevant online learning content featuring company leadership or management.

# Ways to use Custom Content

Custom content could be your way in. Here are a few scenarios to help you envision how this might play out in your organization.

## Onboarding

The onboarding process is crucial to employee retention, productivity, and success. Help your new hires get acquainted with your business and company culture before they walk in the door for their first day.

## New Manager Training

Give your new managers access to internal leaders and management rockstars at scale. Include welcome messaging, overcoming management horror stories, and common scenarios.

## Manager Support

Empower managers to create their own custom content and scale learnings to help their team ramp faster and overcome business challenges.

## Customer-Facing Roles

Customer-facing teams like sales, customer success, and your call centers often need scalable training in response to business changes like new policies or products.

## Introduce New Technology

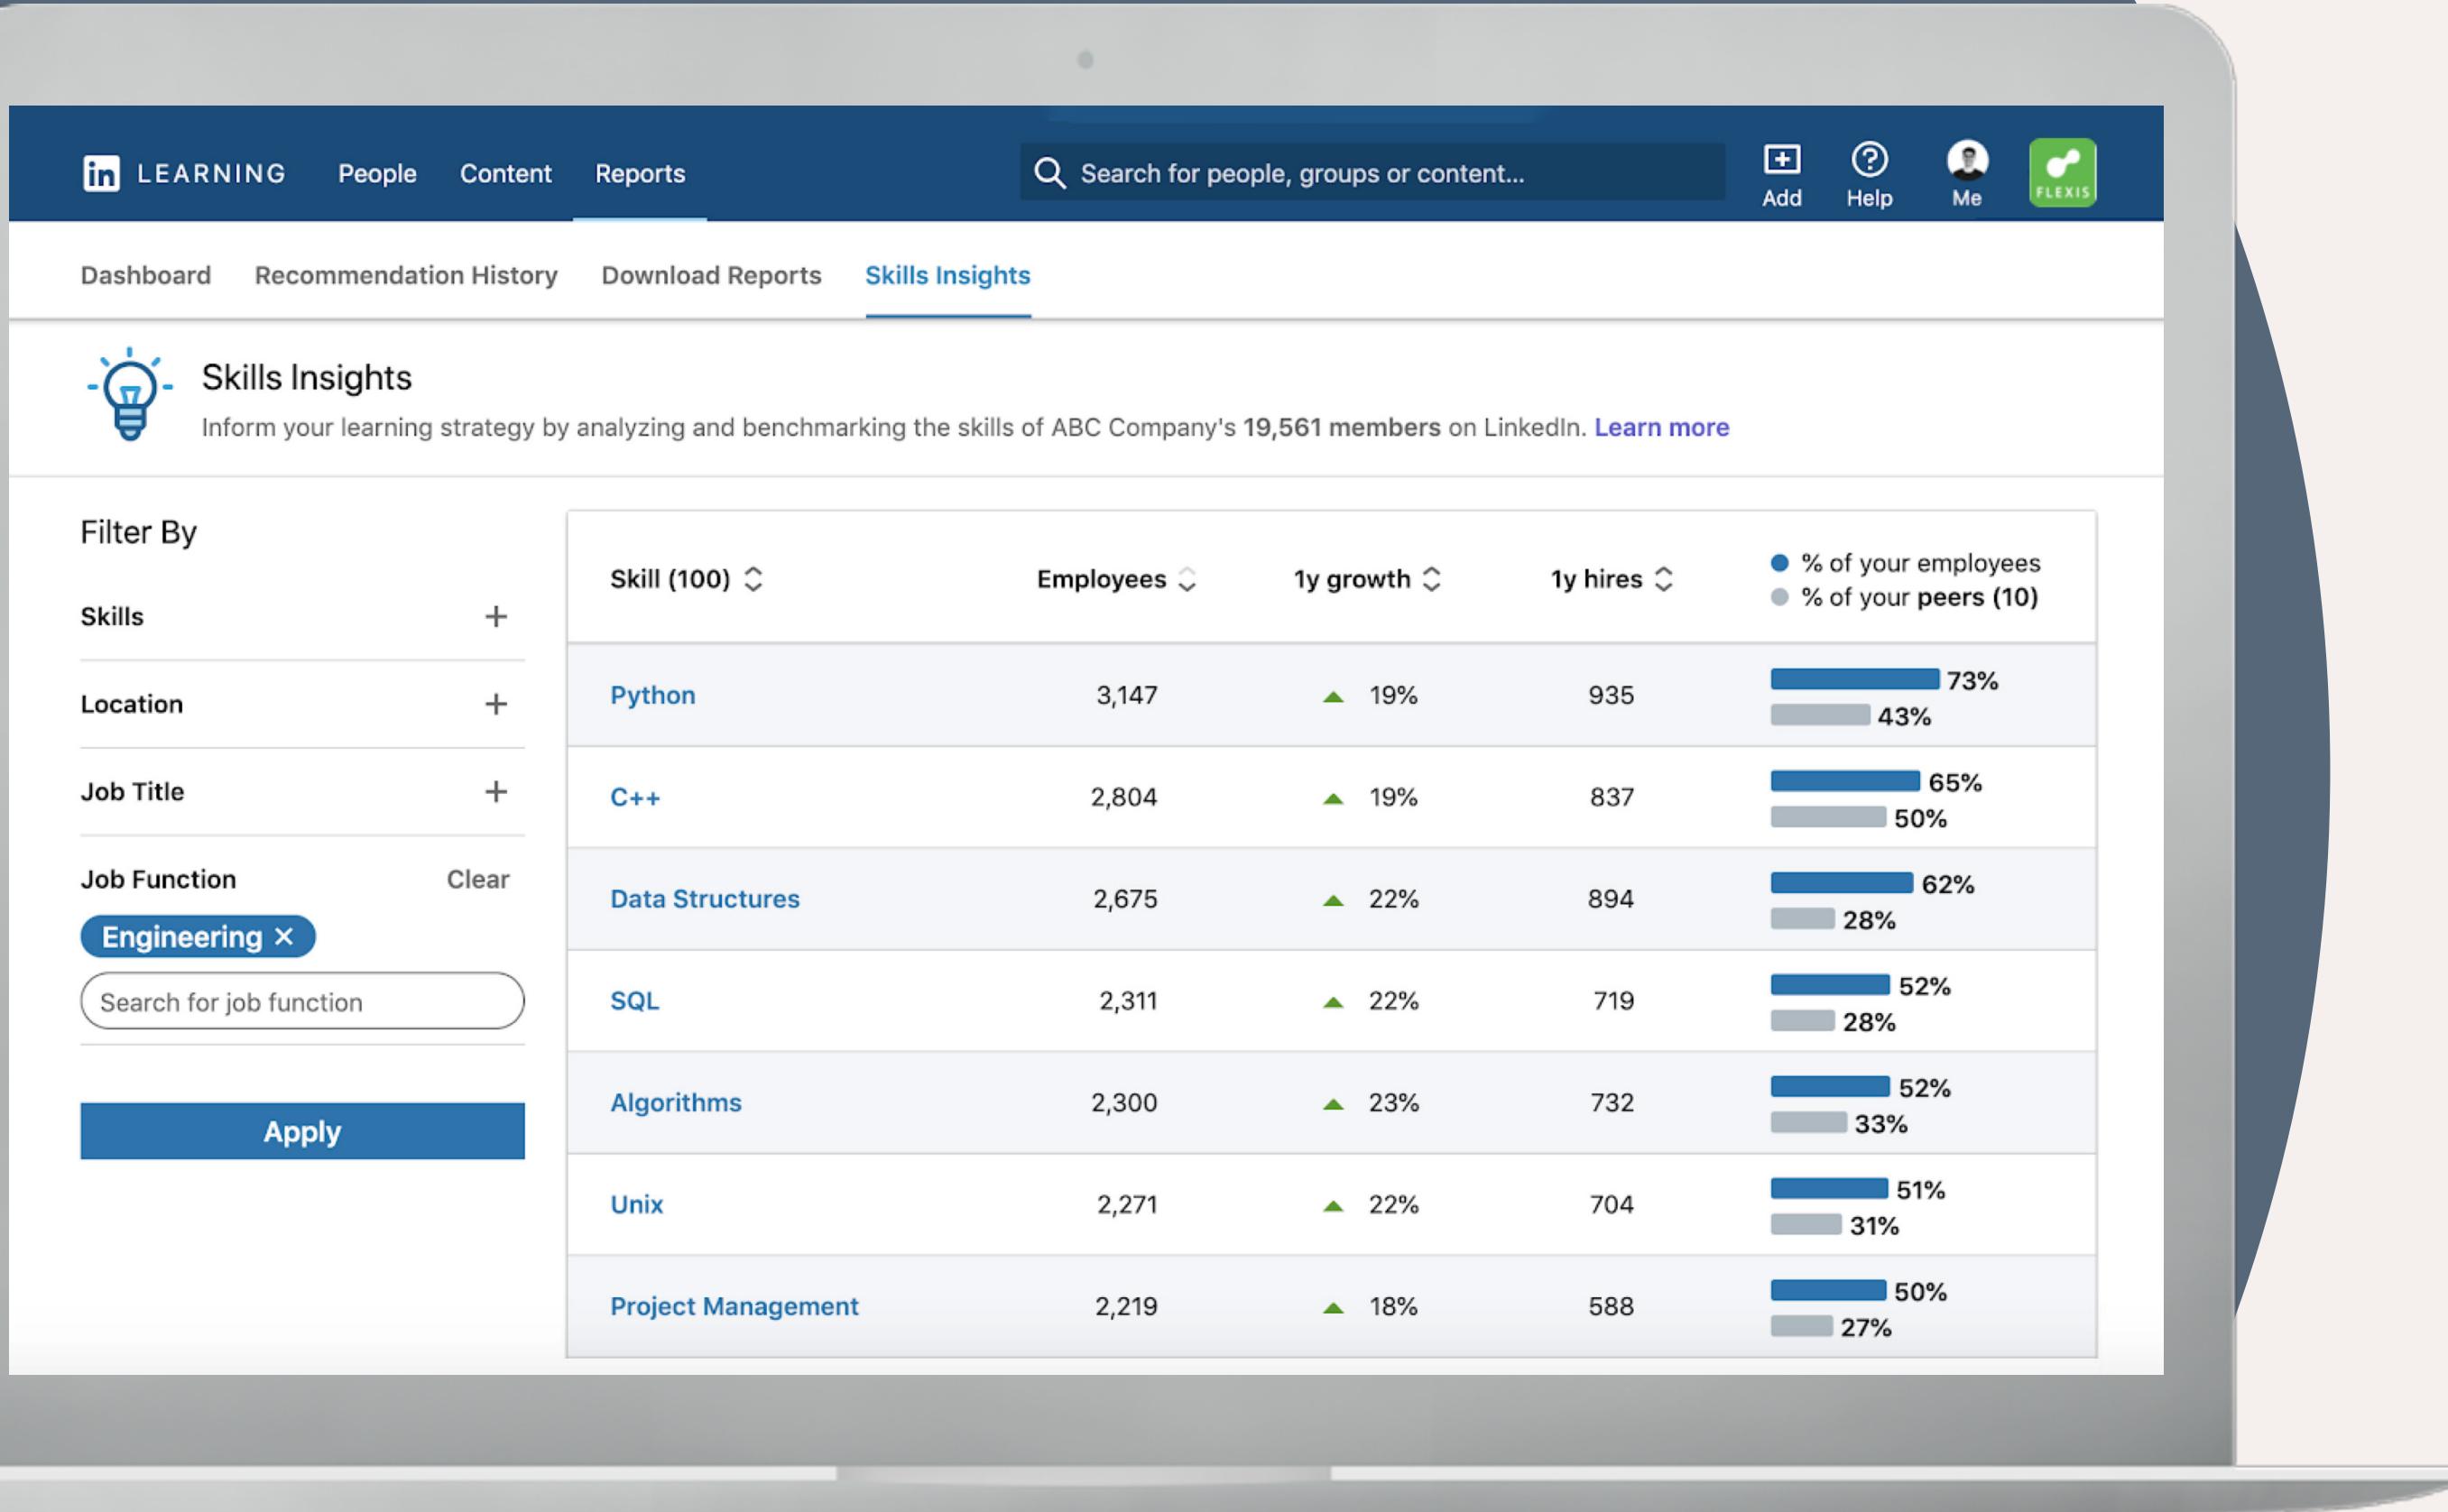

Quickly create an internal video documenting new tools' most popular functions. This increases the productivity of power users and enables the broader organization to self-serve.

Check out [5 Ways to Increase Learner Engagement with Custom Content](#) to learn more about these strategies

## Spotlight Features

# Provide targeted learning with real-time insights

The screenshot shows the LinkedIn Learning Skills Insights interface. At the top, there are navigation links for LEARNING, People, Content, and Reports, along with a search bar and user icons for Add, Help, Me, and FLEXIS. Below the header, there are links for Dashboard, Recommendation History, Download Reports, and Skills Insights. The Skills Insights section is active, featuring a lightbulb icon and the text: "Skills Insights. Inform your learning strategy by analyzing and benchmarking the skills of ABC Company's 19,561 members on LinkedIn. [Learn more](#)". On the left, a "Filter By" sidebar includes sections for Skills, Location, Job Title, and Job Function, with "Engineering" selected. A search bar for job function and an "Apply" button are also present. The main content area displays a table of skills with the following data:

Skill (100)	Employees	1y growth	1y hires	% of your employees	% of your peers (10)
Python	3,147	▲ 19%	935	73%	43%
C++	2,804	▲ 19%	837	65%	50%
Data Structures	2,675	▲ 22%	894	62%	28%
SQL	2,311	▲ 22%	719	52%	28%
Algorithms	2,300	▲ 23%	732	52%	33%
Unix	2,271	▲ 22%	704	51%	31%
Project Management	2,219	▲ 18%	588	50%	27%

Skills Insights taps into LinkedIn's vast inventory of skills data to give you a broad overview of your organization's skill profile.

Curate and recommend content based on skills most important to your business priorities.

1. **Compare** your current skills profile to the skills needed to support your organization's business objectives
2. **Benchmark** your skills profile against peer companies to get insights on potential gaps
3. **Select** any of the displayed skills and find Learning content related to that skill
4. **Recommend** content to learners based on the specific skills you want learners to develop

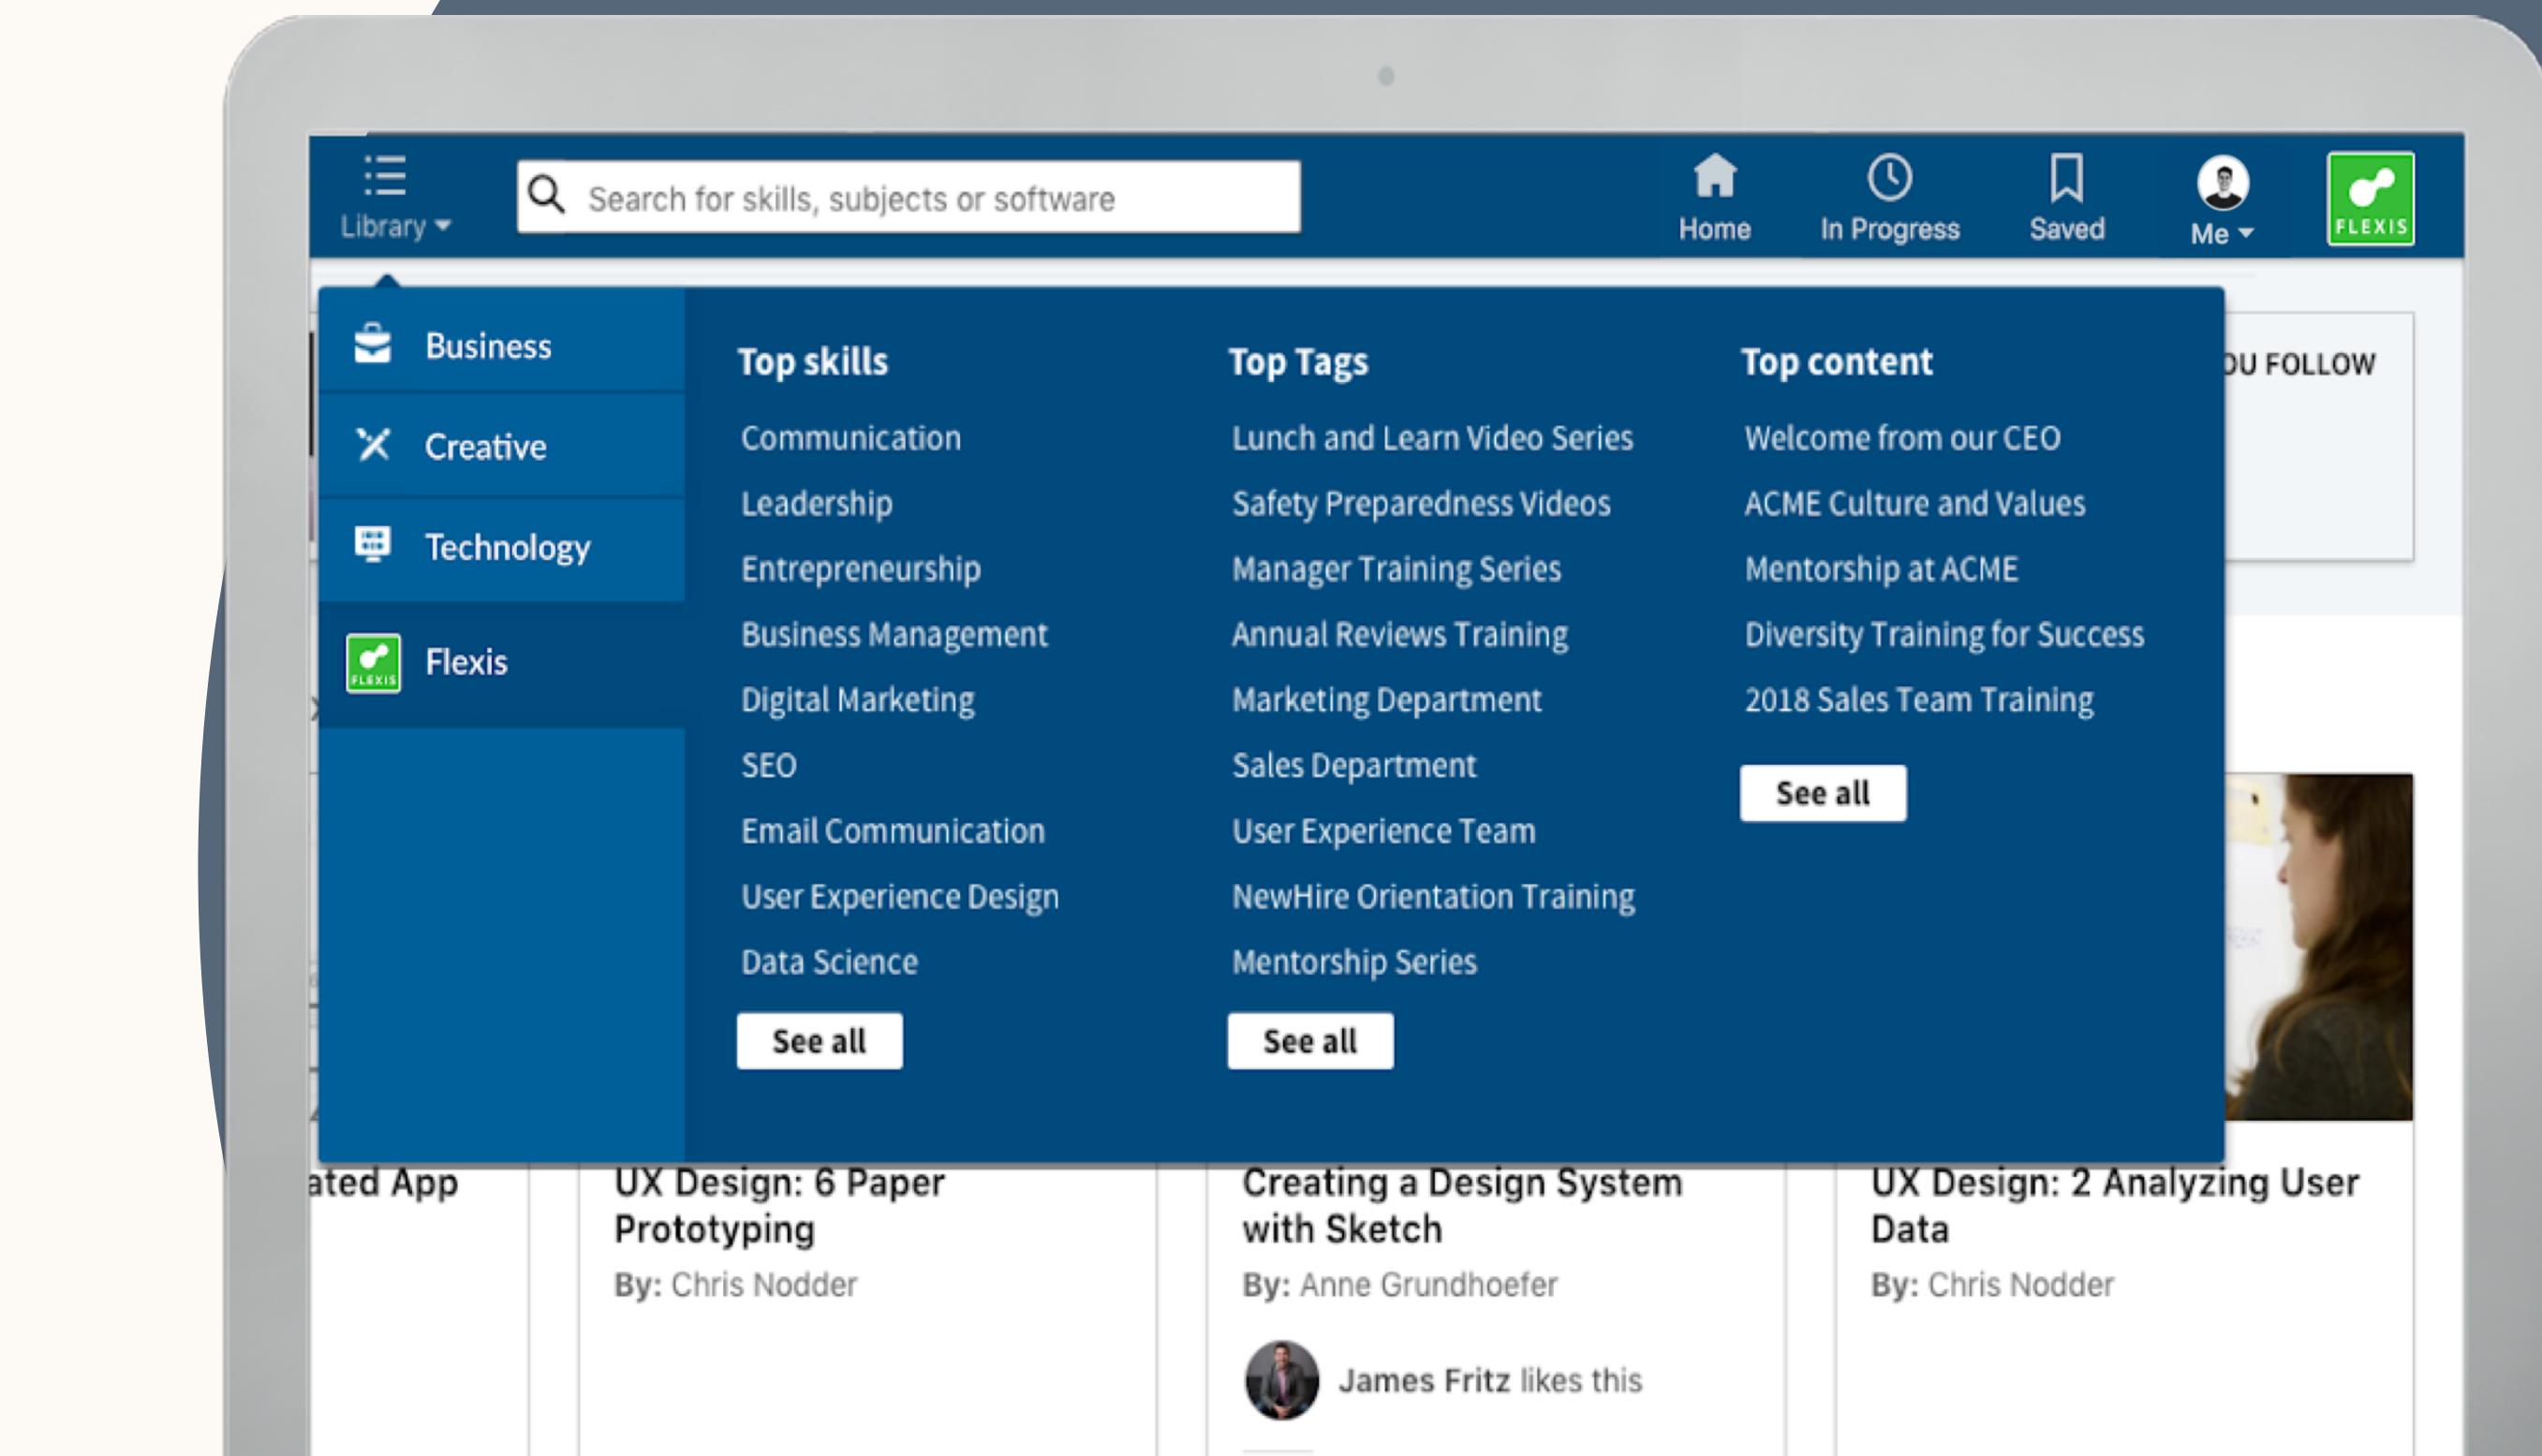

Visit the Help Center to learn more about accessing the [Skills Insights](#) feature.

# FAQs

## Custom Content

### Can I upload content to be hosted on LinkedIn Learning?

If you hold a [LinkedIn Learning Pro license](#), you can upload proprietary, customized videos and documents from your organization on LinkedIn Learning. You can also add custom content within LinkedIn Learning via public links to content hosted on other sites. You can upload links to PowerPoints, PDFs, articles, and more.

### Can I add custom content to learning paths?

You're welcome to add custom content to learning paths. Learn more about [using learning paths](#).

### How does progress tracking work for documents?

We check the progress of custom document uploads by tracking how many pages of a document a learner has viewed and converting that into a percentage. For example, if a document has 10 slides or is 10 pages long and a learner has viewed two of the documents, LinkedIn Learning reports that as 20% complete.

### How does an uploaded custom document get marked as complete?

An uploaded custom document will usually be marked complete if the learner has viewed all the pages/slides in that document.

### Can learners download custom documents from their viewing experience?

At this time, we don't provide learners with the ability to download custom documents from their viewing experience.

### What video and document formats does LinkedIn Learning support for custom content uploads?

For video uploads, we support ASF, AVI, FLV, MPEG-1, MPEG-4, MKV, QuickTime, WebM, H264/AVC, MP4, VP8, VP9, WMV2, and WMV3 file types.

For document uploads, we support DOC, DOCX, ODT, PPT, PPTX, PPS, PPSX, ODP, and PDF file types. [Learn more about the supported file formats and video players for custom uploads](#).

### Can other organizations see custom content I've added for my organization?

Custom content is specific to each organization, so other companies cannot see any content you've added to your account.

# FAQs

## Skills Insights

### How can I use the data I get from Skills Insights?

You can use the Skills Insights feature to:

1. Inform your learning strategy by comparing your current skills profile to the skills needed to support your organization's business objectives. You can filter by specific locations, functions, and titles.
2. Benchmark your company's skills vs. peer organizations to understand what skills your learners should focus on.
3. Track your organization's skills over time to get a directional sense of how your learning initiatives are driving attainment of relevant skills.
4. Click on a skill for a relevant list of content recommendations to help strengthen your organization's skill profile.

### Where does the data for Skills Insights come from?

Skills Insights aggregates skills data from the public profiles of employees that belong to your organization. This data is based on the skills your employees have added to their LinkedIn profile.

### Why can't I access this feature from my organization's Learning license?

Skills Insights is only available for organizations with a [LinkedIn Learning Pro license](#) who have at least 15 employees on LinkedIn with [public member profiles](#).
